Dear Prof. Lee,

Re: Proposed Regulatory Framework for Medical Devices

Hong Kong Doctors Union (HKDU) is the unique trade union with doctor members in both public and private services, registered with the Trade Union Registry to look after the interests and rights of doctors in their employer employee relationship. While we are committed to upgrade the standard of medical doctors to cater for the health of the Hong Kong community, we also relate to the Government the urgent needs of the patients and reflect the true situation in the context of medical care so that the Government will appropriately and efficiently set up policies with long term benefits for the health of Hong Kong citizens.

HKDU is strongly supportive of the long awaited action by the Government to put in place statutory regulation to ensure the safety, performance and quality of medical devices supplied in Hong Kong.

We are supportive of the captioned proposal by the Government. In order to speed up use control regulation, we suggest to shorten the duration for the application of listing of medical devices as proposed by the Government from 5 years down to 3 years. After the deadline for making listing application, new models of medical devices must fulfil the requirements for registration of medical devices for their legal supply in Hong Kong.

We look forward to its early implementation.

Thank you for your attention,

Yours sincerely,

Dr. Chan Pui Kwong
Hon. Secretary
Hong Kong Doctors Union
