Panel on Transport

Subcommittee on Matters Relating to Railways

Motion on "Progress update of the construction of the Shatin to Central Link" raised at the meeting on 7 December 2018 and passed at the meeting on 1 February 2019

That to allay public concern and safeguard passenger safety, this Subcommittee urges the Government to open up more locations and steel bars or coupler connections (including those at the middle and bottom layers of the connections of each bay) for sampling checks as compared to the 80 locations and the 168 steel bars or coupler connections announced earlier by the Highways Department and the MTR Corporation Limited for the opening-up investigation.
