

**LegCo Panel on Environmental Affairs
Meeting on 8 January 1999**

**Progress Report on
Control of Indoor Air Pollution**

The Administration is finalising a consultation document and a guidance notes on improving indoor air quality before consulting the professional bodies in mid June. We intend to launch a public consultation before formulating a comprehensive indoor air quality management programme within 1999. We will consult the EA Panel after the summer recess on our draft implementation programme.
