

**The Quantities and Functions of  
Y2K Non-compliant Systems  
with Rectification Work Outstanding**

**Hong Kong Police Force (Total:14)**

<b>Item</b>	<b>Quantity</b>	<b>Function of the System</b>
Modus Operandi Computer System (MOCS)	1	To assist crime investigation by searching through suspected criminals based on the concept of modus operadi.
Criminal Intelligence Computer System (CICS)	1	To serve as the centralised Criminal Intelligence database, and support investigation and analysis on entities of Police interest.
Enhanced Police Operational Nominal Index Computer System (EPONICS)	1	To organise the Criminal Records Bureau data in an efficient way so as to have access to the database; store/retain multiple conviction information for a given subject.
Enhanced Command and Control System (ECACCS)	1	To provide enhanced computer facilities to meeting current and future command and control needs for the Hong Kong Police.
Formation Information Communal System (FICS)	1	Main functions of CIS : <ol style="list-style-type: none"> <li>1. Police case creation, enquiry, transfer and reporting;</li> <li>2. Bail;</li> <li>3. Report Room handover;</li> <li>4. Charge;</li> <li>5. Prisoner administration and movement;</li> <li>6. Case property and prisoner property management.</li> </ol>
Regional Information Communal System (RICS)	1	Same as FICS.
Traffic Operations and Management System (TOMS)	1	To provide data entry, retrieving, reporting and statistics to traffic regions in Hong Kong Police.

Building Management System in CLK Airport Police Station	1	To monitor and control the building facilities.
Electronic Fuel Management System in CLK Airport Police Station	1	To monitor and control the fuel supply for vehicles.
Radar Surveillance System (RSS MAR) in Marine Headquarters	1	To provide radar information for marine surveillance.
Fuel Management System in Police Headquarters	1	To monitor and control the fuel supply for vehicles.
Border Fence Protection System in HK/China Border Fence	1	To monitor the status of border to prevent intruder.
Traffic Radio System (TRS)	1	To maintain Regional Traffic Radio Communication with each Police Control Centre.
PABX telephone system in Marine Headquarters	1	Telephone System

**Fire Services Department (Total:1)**

<b>Item</b>	<b>Quantity</b>	<b>Function of the System</b>
Trunked Radio System	1	Communications

**Immigration Department (Total:14)**

<b>Item</b>	<b>Quantity</b>	<b>Function of the System</b>
HKSAR Travel Document Information System	1	To support the processing and issuance of HKSAR travel documents.
ImmD Processing Automation System - Core computer functions	1	To provide common 'infra-structural' functions to support all other Processing Automation Systems.

ImmD Processing Automation System - Taiwan Visit Permit	1	To support the processing of Taiwan Visit Permit applications.
ImmD Processing Automation System - Permits and Visas	1	To support the processing of entry and extension of stay applications.
ImmD Processing Automation System - Registration of Persons	1	To support HK Identity Card registration processes.
ImmD Processing Automation System - Births, Deaths and Marriage	1	To support births, deaths and marriage registration processes.
ImmD Control Automation System	1	To support and control passenger clearance at control points.
Mobile Terminal Turnkey System	1	To support and control passenger clearance on-board vessels and liners.
MV 1000 CCTV System in Lo Wu Terminal	1	To monitor passenger flow in the clearance hall of Lo Wu Terminal.
Automatic Call Distribution System of Immigration Tower	1	To distribute incoming calls to operators of Information Office.
Voice Messaging System of Immigration Tower	1	To record unattended incoming calls.
Interactive Voice Response Systems of ROP offices	1	To process advance booking of appointments for registration of HK Identity Card.
Interactive Voice Response Systems to Information Office	2	To provide pre-recorded Right of Abode, travel document and general immigration information to the public.

**Correctional Services Department (Total:14)**

<b>Item</b>	<b>Quantity</b>	<b>Function of the System</b>
Manufacturing Management & Control System	1	To manage stock inventory and supply of the correctional service industries.

MV 1000 CCTV System Series	1	Security monitoring
MV 500 CCTV System Series	2	Security monitoring
Selective Call Radio Systems	10	Communications

**Government Flying Service (Total:3)**

<b>Item</b>	<b>Quantity</b>	<b>Function of the System</b>
The Chek Lap Kok Headquarters Building Management System	1	Management of building services.
Sikorsky S 70*	1	A secondary navigation system in the helicopter.
Sikorsky S 76*	1	A secondary navigation system in the helicopter.

Note :

- \* Y2K compliance status is being confirmed with the principal supplier, although individual manufacturers have verified that their respective parts should be Y2K compliant.
