With reference to the Government's stated transport policy of using railways as the first choice to meet passenger traffic demand wherever practicable and the ongoing studies to develop the Route 7 highway, which will connect Aberdeen and Kennedy Town, will the Government inform this Council:

- (a) the respective costs incurred so far on feasibility, engineering and environmental studies conducted specifically on Route 7 highway;
- (b) the quantity and proportion of freight traffic that is expected to use Route 7;
- (c) the quantity and proportion of private vehicles expected to use Route 7;
- (d) whether it has assessed if the development of Route 7 is consistent with Government policy of discouraging private car use;
- (e) whether it has conducted a detailed feasibility study of constructing a Mass Transit Railway ("MTR") South Island line as an alternative to Route 7, to meet the traffic demand in the Southern district; if not, of the reasons for that;
- (f) the respective costs of feasibility, engineering and environmental studies conducted on the railway option;
- (g) how the direct costs to the Government in the construction of Route 7 compare to building an MTR South Island line;
- (h) whether it has evaluated the reduction in traffic that will be brought about by a railway on existing roads in the Southern, and whether this would provide sufficient additional capacity to accommodate the growth in freight traffic;
- (i) of the criteria it uses to evaluate road-based versus rail-based options, and the respective weights given to each criterion;
- (j) whether it will consider the overall economic rather than simply the financial aspects of railways versus road projects, and how such economic factors will be included in the final evaluation;
- (k) whether it has estimated the impact on property values of the two options within the area; if so, of the details; and
- (l) whether it has considered alternative uses for the shoreline between Aberdeen and Kennedy Town?
