

**Legislative Council Panel on Health Services**

**Regulation of Health Claims**

**Under the Undesirable Medical Advertisements Ordinance (Cap. 231)**

***Background***

The Undesirable Medical Advertisements Ordinance (UMAO) came into effect in 1953 and was last amended in 1988. The Ordinance prohibits or restricts advertisements likely to lead to the use of any medicine, surgical appliance or treatment for certain diseases, such as cancer, tuberculosis, venereal disease and AIDS. The objective is to prevent the general public from being misled into using improper medicinal products for self-medication in respect of these diseases. A copy of the Schedule setting out the relevant diseases is attached at Appendix.

***Scope of the Regulation***

2. The terms “advertisement” and “medicine” have wide definitions under the Ordinance -

- (a) “advertisement” includes any notice, poster, circular, label, wrapper or document, and any announcement made orally or by any means of producing or transmitting light or sound;
- (b) “medicine” includes any kind of medicament or other curative or preventive substance, and whether a proprietary medicine, a patent medicine, or purported natural remedy.

***Enforcement***

3. The Department of Health (DH) monitors medical and health advertisements in the media including newspapers and magazines. DH also investigates complaints received from members of the public or referred by

organisations such as the Consumer Council. DH will issue warning letters to the person who has published or caused to publish the undesirable advertisement or product labels which contravenes the Ordinance. If the person, upon receiving a warning letter, does not remove the undesirable advertisement involved or recall such products with undesirable labels, the DH will inform the Commissioner of Police, who will investigate and initiate prosecution action where necessary. Any person who contravenes the Ordinance and is found guilty of the offence shall be liable upon a first conviction to a maximum fine of \$10,000, and upon a second or subsequent conviction to a maximum fine of \$25,000 and imprisonment for one year.

***Statistics for the past three years***

4. A breakdown of the statistics of enforcement actions taken during 1997 to 2000 is as follows –

	<b>1997</b>	<b>1998</b>	<b>1999</b>	<b>2000#</b>
<b>No. of newspaper/magazine screened</b>	<b>544</b>	<b>321</b>	<b>612</b>	<b>178</b>
<b>No. of warning letters issued by DH</b>	<b>86</b>	<b>121</b>	<b>178</b>	<b>73</b>
<b>No. of successful prosecution</b>	<b>1</b>	<b>0</b>	<b>0</b>	<b>0</b>

*# Statistics on first quarter of 2000*

5. DH will continue to be vigilant in enforcement action on the UMAO for the protection of public health.
