

Interim Report on Construction and Demolition (C&D) Waste Generated by Public Works Projects

Introduction

Since September 2000, we have taken active steps to reduce the generation of C&D material from public works projects and guidelines have been issued for vetting of the information on the management of C&D material in Public Works Subcommittee (PWSC) papers.

C&D Waste from Public Works Projects

Based on available information, the amount of C&D waste generated by public works projects (approved by PWSC since September 2000), are summarised below :

Type of works	Total Quantity of C&D waste estimated in PWSC Paper (m ³)	Actual quantity of C&D waste generated up to June 2000 (m ³)
Building works	60,000	17,000
Civil engineering works	262,000	33,000
Total	322,000	50,000
