

Select Committed Question dated 31/3/2004

Provide the following information in relation to each of the SARS patients handled by Princess Margaret Hospital and other hospitals who were residents of Amoy Gardens or who were related to Amoy Gardens:

- (a) the onset date;
- (b) the date of admission; and
- (c) the date of admission to Intensive Care Unit.

(a) – (c) Amoy SARS Patient Information by Admission Date

And to provide the date when the index patient of the SARS outbreak at Amoy Gardens started to have diarrhoea.

According to Prince of Wales Hospital's (PWH) record, Patient YY did not give any history of diarrhoea on his first admission on 15 March 2003. During his first episode of stay at PWH from 15 March to 19 March 2003, the hospital did not record any episode of diarrhoea from him. On his second admission on 22 March 2003, he again did not give any history of diarrhoea from his last discharge. However, he was noted to have diarrhoea on the second day of his second admission before he was admitted to ICU on 23 March 2003.
