

ITEM FOR ESTABLISHMENT SUBCOMMITTEE OF FINANCE COMMITTEE

**HEAD 148 – GOVERNMENT SECRETARIAT :
FINANCIAL SERVICES AND THE TREASURY BUREAU
(FINANCIAL SERVICES BRANCH)**

**HEAD 147 – GOVERNMENT SECRETARIAT :
FINANCIAL SERVICES AND THE TREASURY BUREAU
(THE TREASURY BRANCH)**

HEAD 76 – INLAND REVENUE DEPARTMENT

Subhead 000 Operational expenses

Members are invited to recommend to Finance Committee the following changes with effect from 1 April 2004 –

(a) the creation of the following permanent posts –

*Financial Services and the Treasury Bureau
(Financial Services Branch)*

1 Administrative Officer Staff Grade C
(D2) (\$113,520 - \$120,553)

*Financial Services and the Treasury Bureau
(The Treasury Branch)*

1 Administrative Officer Staff Grade B1
(D4) (\$145,150 - \$149,600)

to be offset by the deletion of the following permanent posts –

/Financial

*Financial Services and the Treasury Bureau
(The Treasury Branch)*

1 Administrative Officer Staff Grade B
(D3) (\$127,900 - \$135,550)

1 Administrative Officer Staff Grade C
(D2) (\$113,520 - \$120,553)

Inland Revenue Department

1 Chief Assessor
(D1) (\$95,623 - 101,458)

- (b) the deletion of the following supernumerary post –

*Financial Services and the Treasury Bureau
(The Treasury Branch)*

1 Administrative Officer Staff Grade B1
(D4) (\$145,150 - \$149,600)

- (c) the redeployment of the following permanent posts –

*Financial Services and the Treasury Bureau
(Financial Services Branch)*

4 Administrative Officer Staff Grade C
(D2) (\$113,520 - \$120,553)

*Financial Services and the Treasury Bureau
(The Treasury Branch)*

1 Chief Treasury Accountant
(D1) (\$95,623 - \$101,458)

/Inland

Inland Revenue Department

1 Assistant Commissioner of Inland Revenue
(D2) (\$113,520 - \$120,553)

PROBLEM

We need to re-organise and rationalise the directorate structure under the Financial Services and the Treasury Bureau (FSTB) and the Inland Revenue Department (IRD) to better meet government policy objectives and reflect changes in responsibilities and workload.

PROPOSAL

2. Our proposals will have the net effect of –
 - (a) deleting one permanent Administrative Officer Staff Grade B (AOSGB) (D3) post, one permanent Administrative Officer Staff Grade C (AOSGC) (D2) post and one supernumerary Administrative Officer Staff Grade B1 (AOSGB1) (D4) post in the Treasury Branch and one permanent Chief Assessor (CA) (D1) post in IRD;
 - (b) creating one permanent AOSGC (D2) post in the Financial Services Branch (FSB) and one permanent AOSGB1 (D4) post in the Treasury Branch of FSTB; and
 - (c) redistributing the duties of the four existing AOSGC (D2) posts in FSB, and redeploying one Chief Treasury Accountant (CTA) (D1) post in the Treasury Branch and one Assistant Commissioner of Inland Revenue (AC) (D2) post in IRD.

The proposed changes, analysed by the three relevant Heads of expenditure for the FSB, Treasury Branch and IRD, are set out in the following sections (A), (B) and (C) respectively.

JUSTIFICATION

(A) Head 148 Government Secretariat: Financial Services and the Treasury Bureau (Financial Services Branch)

/Create

Create one additional permanent AOSGC(D2) post as PAS(FS)5

3. The financial services industry is a major pillar of the Hong Kong economy. The further development of the financial services industry is essential to Hong Kong's future economic growth. Hong Kong plays a vital role in raising foreign capital for Mainland enterprises, and provides an important gateway for international investors to reach the Mainland market. Co-operation between Hong Kong and the Mainland in different financial services sectors is growing. At the international level, there is increasingly keen competition among financial markets. To enhance Hong Kong's position as an international financial centre and the premier capital formation centre for the Mainland, we must compete on our strengths. The principal role of the Government is to ensure that the legal framework, regulatory environment and market infrastructure are meeting the needs of the market. These require, inter alia, devotion of directorate resources proportionate to the sophistication of the relevant policy initiatives on a permanent basis.

Facilitating Financial Market Development

4. Market development is one of our priority initiatives. We will build on Hong Kong's strengths as the gateway to the Mainland and a major international financial centre in the Asian time zone. With China's accession to the World Trade Organization (WTO), the implementation of the Closer Economic Partnership Arrangement (CEPA), and the state-owned enterprise reform and infrastructure development, new business opportunities are opening up for Hong Kong's financial services industry. We will step up our efforts to ensure that the legal framework in respect of the financial markets is conducive to the operation of market players, and enhance the quality of our markets by upgrading corporate governance in the light of international developments. These would help retain the business that is already in Hong Kong, and attract new players and capital. We will also engage the market in exploring ways to attract liquidity and promote the introduction of new products, thereby enhancing the depth and breadth of our market. Towards this end, we have already joined hands with other interested parties in promoting Hong Kong's financial services in various cities in the Mainland and would continue to extend our engagement efforts under the aegis of CEPA or through forums like the Hong Kong–Guangdong Co-operation Joint Conference and Hong Kong–Shanghai Co-operation Joint Conference.

5. In the banking area, we will have to ensure the successful implementation of the deposit protection scheme and the scheme for providing personal RMB business by banks in Hong Kong. We will monitor the implementation of a Commercial Credit Reference Agency which would help enhance the credit risk management capability of banks and thus facilitate greater access to bank credit by small and medium sized enterprises. We will also facilitate and co-ordinate the legislative work required for bank mergers.

/6.

6. For the fund management sector, we will strive to provide a favourable business environment for international fund management companies. To enhance our competitiveness at the international level, we need to identify regulatory impediments to market development, such as laws and regulations that limit the design of new financial products, in consultation with the market, and remove unnecessary barriers with reference to provisions in other jurisdictions. We will also join hands with interested parties to enhance investor education and promote investor awareness of fund product features.

7. The regulatory regime governing offers of investment to the public is not up-to-date and in many aspects burdensome. It has become apparent that the legislative amendments and other piecemeal measures introduced over the years cannot accommodate the diversity required for offering structures and other market practices prevalent in international financial markets today. We need to revamp and maintain the regulatory regime to cope with the rapid changes in the means of fund raising, the increasingly popular use of derivatives and other instruments for corporate finance purposes, etc. with a view to strengthening Hong Kong's position as a major international capital formation centre for the Mainland. The exercise would involve a comprehensive review of relevant local laws and regulations governing offers of investment, which in turn requires in-depth study of regulatory reforms introduced in other major financial centres, extensive consultation with market players, and ultimately substantial legislative amendments to the Companies Ordinance and the Securities and Futures Ordinance.

8. The bond market is a relatively undeveloped part of the financial market. More work is needed to increase the depth and breath of this market through a multi-pronged approach by stepping up engagement with the industry bodies and market players, encouraging the public sector to issue bonds (in particular retail bonds), and exploring new channels for distribution of bonds to retail investors (e.g. through the brokers at the retail level). In particular, we will endeavour to create a favourable environment that is conducive to the development of the bond market by providing the necessary financial infrastructure, simplifying the issuance process and considering appropriate tax incentives. We will also continue our efforts in investor education together with other bodies.

Enhancement of Market Infrastructure

9. Developing a modern and robust market infrastructure is a key element in enhancing the status of Hong Kong as a major international financial centre. As competition in securities markets increasingly focuses on the ability of a market to provide value-added services through technology upgrading, innovation and user-friendly access, we see a strong need to build an infrastructure that will enhance the diversity and effectiveness of clearing and settlement of transactions and ensure the reliability and integrity of the risk management system.

10. In this regard, FSB undertakes extensive co-ordination among financial regulators such as the Securities and Futures Commission (SFC), the Hong Kong Monetary Authority (HKMA) as well as relevant market operators including the Hong Kong Exchanges and Clearing Limited (HKEx) in taking various initiatives, including developing a scripless securities market which would further enhance efficiency and security in the system. The HKEx has completed public consultation on the scripless market initiative in December 2003, and we expect a detailed operational model to be available in the second quarter of 2004. In taking forward the scripless market initiative, we will also need to develop the necessary legal framework. We will engage stakeholders such as the share registrars, custodians, clearing and settlement houses, issuers and legal professionals to ensure that the proposal is acceptable to market participants. Complicated legal issues such as the transfer of ownership and linkages with overseas jurisdictions will need to be carefully examined, and considerable amendments to the Companies Ordinance, securities and futures legislation and other related laws and regulations are envisaged. In addition, we will seek to ensure a smooth transition from a physical share certificate system to a scripless system, and the benefits and costs of the new system are equitably shared amongst stakeholders.

11. Clearing and settlement systems for funds and securities are essential infrastructures for the smooth functioning of financial markets. To enhance the general safety and efficiency of such systems and provide legal certainty to transactions effected through such systems, we will need to devise new legislation to provide for a formal regulatory regime and for settlement finality in such systems. This would also facilitate the early admission of Hong Kong Dollars into the Continuous Link Settlement System, which is a global clearing and settlement system for cross-border foreign exchange transactions. We will aim to secure early implementation of these initiatives and oversee their smooth operation.

12. To strengthen our risk management ability, we conduct market contingency rehearsals on a regular basis. This involves major government officials from the Financial Secretary to relevant directorate officers, as well as all major financial market regulators and operators. FSB provides the necessary support as the project manager and co-ordinator, and simulates relevant scenarios for activating and testing the risk management readiness of major players in each rehearsal. In addition, to enhance cross-market surveillance and risk management, it also provides support for the Financial Stability Committee since its inception in May 2000. This Committee has further strengthened its terms of reference on the recommendations made by the International Monetary Fund Financial Sector Assessment Programme in mid-2003.

/13.

13. The work arising from all the above initiatives, in addition to the on-going commitments, makes it difficult for the Principal Assistant Secretaries (Financial Services) (PAS(FS)s) to accord due degree of attention to new policy initiatives. As a stop-gap measure, the HKMA has lent its support to FSB, since December 2002, with a secondee who has been temporarily deployed to perform policy functions at the PAS(FS) level. We however cannot rely on this temporary arrangement to cope with the long-term additional workload. We need the support of an additional PAS(FS) at AOSGC rank on a permanent basis. We have considered but ruled out the option of creating a supernumerary post for the purpose, in view of the on-going nature of the additional work. The proposed post, if approved, will be designated as PAS(FS)5. An organisation chart showing the proposed changes is at Enclosure 1.

Encl. 1

Re-distribute duties and responsibilities for the PAS(FS)s

14. The existing four PAS(FS) posts were created from 1986 to 1999 to address policy issues relating to companies, banking, securities and Mandatory Provident Fund and retirement schemes as they emerged over time. Their duties have evolved over time to cater for new initiatives arising from the development of the financial markets and as policy and legislative projects on financial services become more complicated and sophisticated. With the proposed PAS(FS)5 post, we propose to rationalize the allocation of duties and responsibilities among the PAS(FS)s to enhance synergy.

15. PAS(FS)1 will take on the regulation of listing and market development issues in relation to debt market, financial products, fund management industry and offers of investment. He will provide policy input on a number of issues including disclosure of interests and market misconduct. He will be responsible for policy matters relating to the housekeeping of Insider Dealing Tribunal, Market Misconduct Tribunal and the Securities and Futures Appeals Tribunal, and provide secretariat support to the Process Review Panel of the SFC. He will also deal with matters relating to HKEx and promotion of Hong Kong as an international financial centre overseas and in the Mainland.

16. PAS(FS)2 will oversee matters relating to the development of market infrastructure including scripless securities market, investor compensation, and supervision of intermediaries in the securities and futures markets. He will co-ordinate among the regulators on risk management matters including market contingency planning and other cross-market issues such as providing support for the Financial Stability Committee. He will be responsible for the maintenance and regular update of the Securities and Futures Ordinance in the light of market development. He will be in charge of housekeeping matters relating to the SFC,

/like

like processing its budget, annual reports, appointments, and subsidiary legislation made by the SFC which requires prior consultation with the Financial Secretary. He will also co-ordinate CEPA related matters in the financial services sector.

17. PAS(FS)3 will tackle insurance policy matters, for example, the review of the institutional set-up of the Insurance Authority; feasibility study of establishing policyholders' protection funds; and consultancy study on the supervisory framework of the assets of long-term insurers. All these are major projects that involve considerable policy input and have attracted much interest of the relevant stakeholders. Moreover, he will deal with retirement scheme policy matters and the on-going review of the relevant legislation. On this front, he is specifically responsible for the Administration's interface with the Mandatory Provident Fund Schemes Authority (MPFA), such as handling MPFA's submissions to the Government (e.g. the Authority's annual corporate plan and report). In addition, he is responsible for providing support to the Council of Financial Regulators chaired by the Financial Secretary and the internal administration of FSB. Lastly, he is the subject officer responsible for matters relating to human resources development in the financial services sector.

18. PAS(FS)4 will deal with policies in respect of companies, from their incorporation to dissolution. He will also be in charge of policy responsibility for bankruptcy matters and the self-regulatory regime of accountants. He will oversee the work of the Companies Registry and the Official Receiver's Office, and co-ordinate trade matters in respect of financial services under the WTO. Among the major initiatives, there are a number of areas which require substantial policy input. These include the implementation of recommendations made by the Standing Committee on Company Law Reform to modernize the Companies Ordinance and improve corporate governance. He will also be responsible for taking forward the proposals to enhance the oversight of the public interest activities of auditors and to establish a Financial Reporting Review Panel.

19. PAS(FS)5 will be responsible for the review and maintenance of Banking Ordinance, and liaison with the HKMA on banking and monetary issues. He will take on the development and monitoring of the deposit protection scheme, as well as co-ordinate and facilitate legislative work required for bank mergers. In addition, he will co-ordinate input into Hong Kong's participation in international forums such as International Monetary Fund, Asia-Pacific Economic Cooperation, Organization for Economic Co-operation and Development, and the Financial Action Task Force against money laundering.

Encls. 20. The revised job descriptions of PAS(FS)1, PAS(FS)2, PAS(FS)3,
2 - 6 PAS(FS)4 and the proposed job description of PAS(FS)5 are at Enclosures 2 to 6
respectively.

**(B) Head 147 Government Secretariat: Financial Services and the Treasury
Bureau (The Treasury Branch)**

***Upgrade on a permanent basis the Deputy Secretary (Treasury)2 post from
AOSGB(D3) to AOSGB1(D4)***

Encl. 7 21. There are three permanent posts of Deputy Secretary in the Treasury
Branch each overseeing a specific portfolio of work as indicated in the organisation
chart at Enclosure 7. One of them, the Deputy Secretary (Treasury)1, is ranked at
AOSGB1 (D4) level. The remaining two are ranked at AOSGB (D3). On 23 May
2001, Members discussed EC(2001-02)9 and endorsed the creation of a
supernumerary post of AOSGB1 (D4), held against a permanent AOSGB (D3)
post, for three years to reflect the expanded responsibilities of the post of Deputy
Secretary (Treasury)2 having regard to the importance and complexity of work to
be undertaken. The supernumerary post will lapse on 8 June 2004. We have
Encl. 8 reviewed the level required of this post having regard to the latest development and
its future work. The main duties of the post are listed at Enclosure 8.

Encls. 22. The Administration has been making major equity investments and
9 & 10 providing loans in support of economic and social development to improve Hong
Kong's competitiveness and living environment. In the last several years, the
Deputy Secretary (Treasury)2 participated in negotiations with commercial parties
which culminated in the Government taking strategic investment decisions in
the Hong Kong International Theme Park, the Cyberport and the International
Exhibition Centre. He has provided the main input with respect to the financial
aspects of the study of the merger of the two railway companies and the proposed
privatisation of the Airport Authority. He has taken charge of negotiations with the
Urban Renewal Authority and the Housing Authority on the kind and quantum of
financial support to be extended to them to enable them to achieve their mission in
a financially optimal manner, as well as provided suggestions on financing options
for these entities such as disposal of assets. To illustrate his huge portfolio, we
attach at Enclosures 9 and 10 financial statements of the Capital Investment
Fund (\$487.7 billion) and the Loan Fund (\$32.4 billion^{Note}) as at 31 March 2003
respectively. Government's efforts in making major equity investments and
providing loans in support of economic and social development will continue in
future.

/23.

^{Note} Approximately half of the loans pertaining to housing have now been sold to the Hong Kong Mortgage Corporation.

23. In addition, given the fiscal situation and the fundamental change in the structure of our public finances, the Administration needs to develop and execute strategies to raise revenue both for the shorter term through capital financing means as well as for the longer term such that we can fund our expenditure on a continuous basis. For instance, in order to meet cashflow needs in the short to medium term, the Administration has mapped out and will implement an extensive asset sale and securitisation programme which is expected to raise \$112 billion over a period of five years. The programme includes the sale of civil service and 'home starter' housing loans, sale of Government's shares in railway companies, privatisation of the Airport and securitisation of toll roads. The Administration will also be actively considering the issuance of Government bonds to raise additional capital revenue to supplement the programme. For the longer term, the Administration is considering measures which can improve our fiscal position and broaden our tax base. These measures include the introduction of a goods and services tax (GST). The Treasury Branch has set up an Inter-departmental Study Committee to conduct an in-depth study on GST. The Committee will research into the experience of overseas jurisdictions in implementing GST and devise a detailed GST framework which is suitable for Hong Kong. The Deputy Secretary (Treasury)² directs and oversees the work.

24. The Deputy Secretary (Treasury)² is also in charge of the programme to negotiate with other jurisdictions comprehensive agreements for avoidance of double taxation (CDTAs), which is aimed at promoting investment in Hong Kong. Many of our key trading and investment partners have responded positively to Hong Kong's approach for holding bilateral talks on such agreements and such negotiations are usually carried out by very senior officials in these jurisdictions. Negotiations with four countries were held in 2003 and negotiations with four others are being arranged for 2004. We expect that such negotiations will continue in the coming years until a network of CDTAs have been set up with our major trading and investment partners.

25. Having regard to these developments, we foresee workload and the level of responsibilities of the post will remain the same or even increase in the foreseeable future. As such we propose a permanent upgrading, following which it is no longer necessary to retain the supernumerary AOSGB1 post endorsed by Members in 2001.

26. Before putting forward the above recommendation, we have again considered the option of redistributing the duties of the three Deputy Secretary posts in the Treasury Branch. We have come to the conclusion that this option is neither practicable nor desirable.

/Delete

Delete one permanent AOSGC (D2) post

27. The Deputy Secretary (Treasury)¹ is underpinned by six directorate officers, five ranked at D2 and one ranked at D1. Four of the D2 posts which are internally known as Resource Principal Assistant Secretaries (Resource PASs) are responsible for the financial aspects including the use and provision of resources for some 11 bureaux, 55 departments and 11 offices/statutory bodies/groups under their schedule. Specifically they advise on the financial implications of policy initiatives from bureaux and departments, examine requests for additional resources including vetting of submissions to the Policy Committee, Executive Council, and various committees and panels of the Legislative Council, assist in the allocation of resources and preparation of the annual Estimates of Expenditure as well as oversee in-year management of expenditure. A copy of the responsibilities and duties of the Resource PAS posts is at Enclosure 11.

Encl. 11

28. Upon the introduction of the operating expenditure envelope funding approach in 2002 and the full-scale adoption of the One-Line Vote arrangement for controlling officers in 2003, bureaux and departments have been given greater flexibility in the deployment of resources. The work of the Resource PASs now focuses more on the policy and strategic aspects of funding initiatives than on the day-to-day management of resources within each operating expenditure envelope.

29. In the light of these changes, we see scope for streamlining the directorate structure under Deputy Secretary (Treasury)¹ and propose to delete one of the four Resource PAS posts. The expenditure heads currently under the purview of the Resource PAS post to be deleted will be shared among the remaining three Resource PAS posts, whose job descriptions will remain unchanged. We will make consequential adjustments for supporting staff administratively.

Redeploy one post of Chief Treasury Accountant (D1)

30. H Division is headed by an Assistant Director of Accounting Services (ADAS) with no permanent directorate support for the time being. The Division serves as the central office for co-ordinating the preparation of the Budget and related data on fiscal forecast. It co-ordinates resource allocation and budget work, provides Government's medium range forecast, compiles the necessary materials for reference by the principal officials involved in preparing the budget, co-ordinates the central requirements of financial information system, as well as liaising with IMF, credit agencies, press, academics and other interested parties on fiscal and economic data.

31. The work of H Division has become more complex and demanding in recent years following the introduction of the envelope funding approach and the surfacing of a structural deficit problem in our public finances. The Division needs to refine the ground rules on the authority and flexibility in the redeployment of resources by Bureaux/Departments, improve reporting and controlling mechanisms and revise the contents and presentation of the annual estimates. It also needs to review the expenditure ceilings to be imposed on all bureaux and departments and recommend realistic savings targets. Separately, H Division is heavily involved in the preparation of the accrual-based accounts and needs to provide advice to the Treasury on the information needs of the new Government Financial Management Information System.

32. We carried out a review of the responsibilities under H and the Management Accounting (MA) Divisions of Treasury Branch. As a result, the MA Division, also headed by an ADAS, has swapped its CTA for a Senior Treasury Accountant (STA) of the H Division on a trial basis since 2002 to help H Division to deal with the increased work at the directorate level. The change has been made possible partly because of the lower volume of work on revision of government fees and charges and other initiatives in the light for MA Division of the financial climate. The work of the former CTA(MA) is now undertaken by the STA redeployed from H Division. In the light of the successful trial, we propose to continue the redeployment on a permanent basis. The job descriptions of the former CTA(MA) and the present CTA(H) are at Enclosure 12 and 13 respectively.

Encls.
12 & 13

(C) Head 76 Inland Revenue Department

Delete one Chief Assessor (D1) post

33. The Training Section of IRD, which is currently headed by a CA and comprises five non-directorate staff, provides training (which includes the organisation plus teaching work) to newly recruited Assistant Assessors (AA), and supports the Deputy Commissioner of Inland Revenue (Operations) (DCIR(O)) in the overall co-ordination of the department's training plans and programmes for staff. Due to the general recruitment freeze, no recruitment exercise of AAs has been conducted since 1 April 2003. This situation will continue. As a result, the responsibilities of the Training Section have been substantially reduced. We see scope to downsize the section as well as to downgrade the ranking of the section head. The existing and proposed organisation charts of the Training Section are set out in Enclosure 14. DCIR(O), with support from the AC proposed to be posted to the Headquarters (HQ) Unit, will continue to oversee and monitor the provision of suitable training for serving staff to ensure that their professional knowledge and expertise are kept abreast with the changing work requirements.

Encl. 14

/Redeploy

Redeploy one Assistant Commissioner of Inland Revenue post

Encl. 15 34. The present organisation chart of IRD and the main responsibilities of the department's various units are set out in Enclosure 15. Units 1, 3 and 4 are each headed by an AC. Unit 2 handles the tax assessment of some three million individuals, 0.3 million employers and 1.2 million jointly owned properties. It has a staff force of 1 348 (44% of the establishment of the IRD), and is underpinned by two ACs. There is no AC in the Commissioner's Unit and the HQ Unit.

35. As part of the department's continued efforts in streamlining procedures and efficiency improvement, IRD has been implementing since 1999-2000 its Second Five-year Information Systems Strategic Plan (ISSP). Under this ISSP, the department's information technology infrastructure has been strengthened and it now possesses the capacity to process large quantities of transactions concurrently. Separately, the new Assess First Audit Later (AFAL) project allows assessments on returns which meet the pre-set criteria (about 70% of all returns) to be issued immediately without going through detailed examination upon receipt and are only subject to desk audit later on. These two major developments will enable the department to re-engineer its workflow and achieve economies of scale by –

- (a) centralising the front-end handling of all inward mails, enquiries and issue of assessments at a centralised Document Processing Centre (DPC); and
- (b) despatching outward mails and managing old records on a departmental basis through two other centralised processing centres viz. Output Despatch Centre and Tax Records Centre respectively.

36. The above three centralised processing centres will be established in early 2004 under the HQ Unit. They will take over certain across-unit common functions and business processes. In addition, the Property Tax, Test and Review (PTR) Section, the work of which is closely related to the DPC, will be transferred from Unit 2 to the HQ Unit. The restructured HQ Unit will be responsible for the issue and front-end processing of all tax returns filed by taxpayers and employers, as well as the issue of relatively straight forward assessments and will deal with related operational and technical matters including enquiries, objections and legislative amendments. It will also provide services to other business units including output despatch of correspondence, tax record management, counter and telephone enquiries, information technology support and staff training.

/37.

37. In view of the transfer of the wide-ranging activities from Unit 2 to the HQ Unit, we consider it necessary to redeploy one of the ACs currently in Unit 2 to oversee the work of the new HQ Unit which will oversee increased responsibilities. AC1(Unit 2) will be re-designated as AC(HQ). He will continue to perform the full range of high level duties in respect of the tax type and assessments under his area of responsibility, oversee the operations of the centralised processing centres and monitor the relevant assessing programmes under the AFAL System, administer the PTR Section in the handling of assessments for complicated cases, desk audits, objection processing, compliance matters, performance pledges and complaints, etc., give technical advice on Property Tax matters and deal with legislative amendments related to Property Tax.

38. AC(HQ) will also oversee and co-ordinate an in-depth study concerning IRD's work to facilitate the implementation of a Goods and Services Tax in the longer term. In addition, he will assist the DCIR(O) in overseeing the department's training programmes after the deletion of the CA(Training) post, the Information Systems Division as well as the department's service standards in view of the increased business needs and public expectation. This arrangement can relieve some of the workload of the DCIR(O) who can spend more efforts in assisting the Commissioner of Inland Revenue in formulating policies in tackling complex tax avoidance arrangements and tax evasion, and in strengthening tax audit and taxpayer education on tax compliance.

39. About 400 staff (340 of which from Unit 2) will be transferred from other units to the HQ Unit to perform the duties in the processing centres. Besides, 80 staff of the PTR Section will also be transferred from Unit 2 to the HQ Unit.

40. The restructured Unit 2 will be headed by one instead of two ACs whose job descriptions will remain largely unchanged. Unit 2 will continue to be responsible for assessing works which involve more complex cases, such as non-AFAL assessments, post-assessment desk audit, objections, informer cases, penal action on non-compliance cases, etc. It will have an establishment of around 900 staff.

Encl. 16
Encls.
17 - 19

41. The proposed organisation chart of IRD is at Enclosure 16. The job descriptions of the two existing AC posts at Unit 2 are at Enclosures 17 and 18 while the duties of the proposed AC(HQ) is at Enclosure 19.

/FINANCIAL

FINANCIAL IMPLICATIONS

42. The proposed changes involving permanent directorate posts will bring about the following net savings in notional annual salary cost at mid-point –

	Posts	\$	No. of posts
	AOSGB1 (D4)	+1,795,200	+1
	AOSGC (D2)	+1,404,420	+1
Less	AOSGB (D3)	-1,580,400	-1
	AOSGC (D2)	-1,404,420	-1
	CA (D1)	-1,180,860	-1
		<u>-966,060</u>	<u>-1</u>

The net savings in full annual average staff cost, including salaries and staff on-cost, amount to some \$1,316,000.

43. The proposals will lead to net savings of two non-directorate posts in the Treasury Branch and 79 in IRD with total savings in notional annual mid-point salary cost of \$25.32 million and in full annual average staff cost of \$40.17 million.

ESTABLISHMENT CHANGES

44. The establishment changes in FSTB and IRD for the last two years are as follows –

Establishment (Note)	Number of posts

C - non-directorate ranks the maximum pay point of which is at or below MPS Point 33 or equivalent

() - number of supernumerary directorate posts

As at 1 February 2004, there is no unfilled directorate post in the FSB and the Treasury Branch. There is one unfilled directorate post in IRD, which is the CA (D1) post now proposed for deletion.

@ FSB is comprised of three major units: Financial Services Division (FSD) which is responsible for the policy work set out in the current proposal; Economic Analysis Division headed by the Government Economist; and the Office of the Commissioner of Insurance. FSD accounts for one-third of the FSB establishment cited here.

CONSULTATION WITH LEGISLATIVE COUNCIL PANEL

45. The Legislative Council Panel on Financial Affairs was consulted on 5 January 2004 and raised no objection to the proposal.

CIVIL SERVICE BUREAU COMMENTS

46. Having regard to the justifications put forward, Civil Service Bureau supports the proposals contained in the paper and considers the grading and ranking of the proposed posts to be appropriate.

ADVICE OF THE STANDING COMMITTEE ON DIRECTORATE SALARIES AND CONDITIONS OF SERVICE

47. The Standing Committee on Directorate Salaries and Conditions of Service has advised that the grading proposed for the posts would be appropriate if the proposal were to be implemented.

Organisation Chart of Financial Services and the Treasury Bureau (Financial Services Branch)

**Proposed Job Description of
Principal Assistant Secretary (Financial Services) 2**

Rank : Administrative Officer Staff Grade C (D2)

Responsible to : Deputy Secretary (Financial Services) 1

Main Duties –

1. to oversee matters relating to the development of market infrastructure including scripless securities market;
2. to provide policy input on investor compensation and supervision of intermediaries in the securities and futures markets;
3. to be responsible for co-ordination of Closer Economic Partnership Arrangement related co-operation in the financial services sector;
4. to co-ordinate among the regulators on risk management matters including market contingency planning and co-ordinating cross-market issues for the Financial Stability Committee;
5. to deal with the maintenance and regular review of the Securities and Futures Ordinance in the light of market development; and
6. to undertake housekeeping of the Securities and Futures Commission.

**Proposed Job Description of
Principal Assistant Secretary (Financial Services) 3**

Rank : Administrative Officer Staff Grade C (D2)

Responsible to : Deputy Secretary (Financial Services) 2

Main Duties –

1. to deal with insurance policy matters including the review of the institutional set-up of the Insurance Authority, feasibility study of establishing policyholders' protection funds and consultancy study on the supervisory framework of the assets of long term insurers;
2. to deal with retirement scheme policy matters and the on-going review of the relevant legislation;
3. to be responsible for the interface with the Mandatory Provident Fund Schemes Authority (MPFA) such as handling MPFA's submissions to the Government as required under the law;
4. to provide support for the Council of Financial Regulators;
5. to deal with matters relating to human resources development in the financial services sector; and
6. to be responsible for the internal administration of the Financial Services Branch.

**Proposed Job Description of
Principal Assistant Secretary (Financial Services) 4**

Rank : Administrative Officer Staff Grade C (D2)

Responsible to : Deputy Secretary (Financial Services) 2

Main Duties –

1. to deal with policy matters in respect of companies, from their incorporation to dissolution;
2. to carry policy responsibility for bankruptcy matters;
3. to oversee the self-regulatory regime of accountants;
4. to co-ordinate trade matters in respect of financial services under the World Trade Organization; and
5. to oversee the work of the Companies Registry and the Official Receiver's Office.

**Proposed Job Description of
Principal Assistant Secretary (Financial Services) 5**

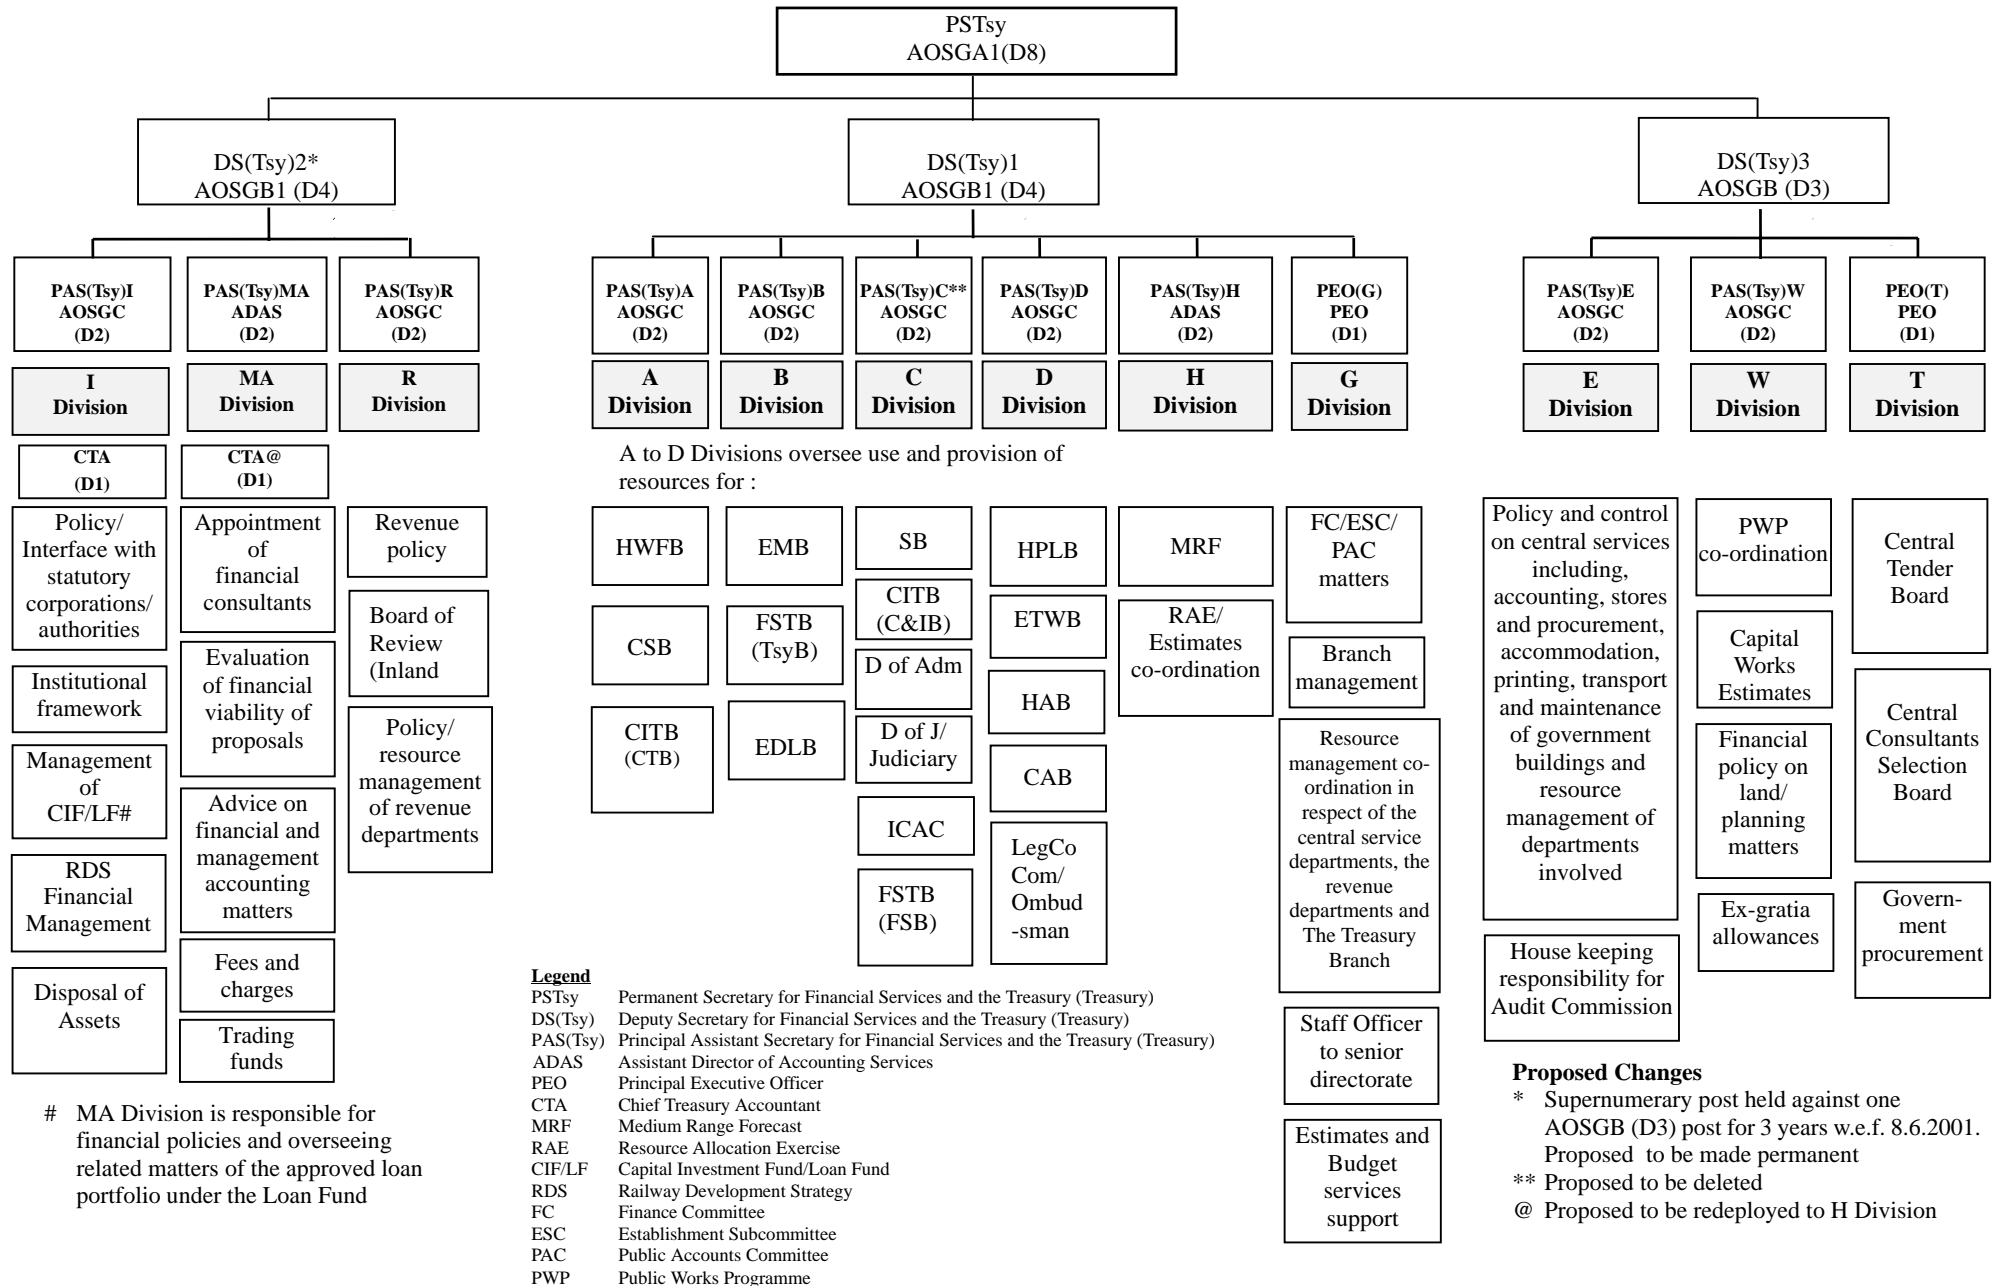

Rank : Administrative Officer Staff Grade C (D2)

Responsible to : Deputy Secretary (Financial Services) 1

Main Duties –

1. to be responsible for the review and maintenance of Banking Ordinance;
2. to provide input on policy and legislative matters and to liaise with the Hong Kong Monetary Authority on banking and monetary issues;
3. to take on the development and monitoring of the deposit protection scheme;
4. to co-ordinate actions against money laundering by the Financial Action Task Force; and
5. to co-ordinate input into Hong Kong's participation in international forums such as International Monetary Fund, Organization for Economic Co-operation and Development and Asia-Pacific Economic Cooperation.

Organisation Chart of Financial Services and the Treasury Bureau (The Treasury Branch)
(as at 1.12.2003)

MA Division is responsible for financial policies and overseeing related matters of the approved loan portfolio under the Loan Fund
