SPEECH BY
THE SECRETARY FOR HEALTH, WELFARE AND FOOD
AT THE LEGISLATIVE COUNCIL
ON 17 DECEMBER 2003

Pharmacy and Poisons Ordinance (Cap 138)

Pharmacy and Poisons (Amendment) (No. 4) Regulation 2003

Poisons List (Amendment) (No. 4) Regulation 2003

Pharmacy and Poisons (Amendment) (No. 5) Regulation 2003

Poisons List (Amendment) (No. 5) Regulation 2003

Madam President,

I move that the four Amendment Regulations as set out under my name in the paper circulated to Members be approved.

2. Currently, we regulate the sale and supply of pharmaceutical products through a registration and inspection system set up in accordance with the Pharmacy and Poisons Ordinance. The Ordinance maintains a

Poisons List under the Poisons List Regulations and several Schedules under the Pharmacy and Poisons Regulations. Pharmaceutical products put on different parts of the Poisons List and different Schedules are subject to different levels of control in regard to the conditions of sale and keeping of records.

3. For the protection of public health, some pharmaceutical products can only be sold in pharmacies under the supervision of registered pharmacists and in their presence. For certain pharmaceutical products, proper records of the particulars of the sale must be kept, including the date of sale, the name and address of the purchaser, the name and quantity of the medicine and the purpose for which it is required. The sale of some pharmaceutical products must be authorized by prescription from a registered medical practitioner, a registered dentist or a registered veterinary surgeon.

4. The four Amendment Regulations now before members seek to amend the Poisons List in the Poisons List Regulations and the Schedules to the Pharmacy and Poisons Regulations for the purpose of imposing control on thirteen new medicines and tightening the control on twenty existing

medicines.

5. Arising from the applications for registration of thirteen new pharmaceutical products, the Pharmacy and Poisons Board proposes to make the Pharmacy and Poisons (Amendment) (No. 4) Regulation 2003 and the Poisons List (Amendment) (No. 4) Regulation 2003 to impose control on these medicines. Specifically, the Board proposes to -

4. add one substance to Part I of the Poisons List such that pharmaceutical products containing this substance must be sold in pharmacies under the supervision of registered pharmacists and in their presence; and

5. add twelve substances to Part I of the Poisons List and the First and Third Schedules to the Pharmacy and Poisons Regulations so that pharmaceutical products containing any of these substances must be sold in pharmacies under the supervision of registered pharmacists and in their presence, with the support of prescriptions.

We propose that the Pharmacy and Poisons (Amendment) (No. 4) Regulation 2003 and the Poisons List (Amendment) (No. 4) Regulation 2003 should

take immediate effect upon gazettal on 19 December 2003 to allow early control and sale of medicines containing these substances.

6. In addition, the Pharmacy and Poisons Board proposes to tighten the control on twenty existing medicines through the making of the Pharmacy and Poisons (Amendment) (No. 5) Regulation 2003 and the Poisons List (Amendment) (No. 5) Regulation 2003. At present, pharmaceutical products containing any of these twenty substances, now classified as non-poisons, are sold in all kinds of medicines outlets. By adding these twenty substances to Part I of the Poisons List and the First and Third Schedules to the Pharmacy and Poisons Regulations, pharmaceutical products containing any of them must be sold in pharmacies under the supervision of registered pharmacists and in their presence, with the support of prescriptions. To allow time for the manufacturers and importers to recall pharmaceutical products containing these substances from medicines outlets other than pharmacies, we propose that these amendments take effect on 19 January 2004.

7. The four Amendment Regulations are made by the Pharmacy and Poisons Board, which is a statutory authority established under section 3 of the Ordinance to regulate the registration and control of pharmaceutical products. The Board comprises members

engaged in the pharmacy, medical and academic professions. The Board considers the proposed amendments necessary in view of the potency, toxicity and potential side effects of the medicines concerned.

8. With these remarks, Madam President, I move the motion.
