

**Comments from Dr Winnie Tang
For
Legislation Amendment for Qualification Framework**

I personally support the idea of setting up the Qualification Framework (QF) initiated by EMB. QF is beneficial to both employers and employees. This can also encourage the good culture of continuous learning in the society. I would like to suggest the Government to extend QF to more industries in need of a formal qualification system as soon as possible.

I also support to appoint Hong Kong Council for Academic Accreditation (HKCAA) as accreditation authority to accredit accreditation organizations that assess individuals for the qualifications under the QF. Moreover, there should be some effective measures in place so that HKCAA can regularly monitor the ongoing quality and standard of various and numerous accreditation organizations.
