

**Legislative Council Members' Meeting-cum-Luncheon
With Yau Tsim Mong District Council members
on Thursday, 28 April 2005**

**Summary of views on
Development of the West Kowloon Cultural District**

1. The single-package approach for the development of the West Kowloon Cultural District (WKCD) would reduce the bargaining power of the Government. This would also reduce the transparency of the process of taking forward the development project, thereby having adverse impact on the image of the Government. The Administration should put in place measures to increase the transparency of the process for development of WKCD.
2. The canopy design could not provide an aesthetical landmark for the cultural district.
3. The Administration should consult the relevant local organizations of the cultural sector to gauge their views on the culture and arts facilities to be provided in WKCD.
