

**Ocean Park Conservation Foundation supports AFCD's proposed amendments in their entirety as a first step towards fisheries management in Hong Kong. Like WWF, we do believe that larger no-take zones and fishing protected areas must be implemented next in order to restore viable, sustainable fisheries to Hong Kong. With the proposed amendments in place, OPCF looks forward to working with AFCD and the fisher folk to find a win-win solution for both the fishing industry and the health of the oceans. I defer the remainder of my time to WWF.**
