At the Panel meeting held on 4 July 2005, members were briefed on the proposal to introduce a new category of "travel insurance agents" catering for travel agents. The Administration was asked then to consider how to address the grave concern expressed by insurance intermediaries.

Early 2008

At the Panel meeting held on 5 December 2005, members noted that the insurance industry had accepted the proposal and requested for a report about one year after its implementation on the number and percentage of travel agents who have passed the qualifying examination and obtained registration, as well as on effectiveness of the registration system and its impact on professional standards among insurance intermediaries.

The new category of "travel insurance agents" was successfully introduced in May 2006 and about 2450 travel agency staff have already gone through the requisite examination as at August 2007. At the Panel meeting on 1 March 2004, members were briefed on major findings of the consultancy study and proposed PPF options. The Administration undertook to revert in due course on the way forward.

The Administration accepted in March 2007 the final consultancy report, the conclusion of which was that while a form of PPF scheme might work in Hong Kong, its success would depend heavily on the scope and nature as well as availability of industry and public support.

In pursuance of this, discussions have commenced with the industry on a non-statutory contingency plan bearing prescribed parameters that resembles a post-funded PPF scheme. The Administration will brief the Panel once relevant details are available.

14. Consultancy study on the supervisory framework of the assets of long term insurers in Hong Kong

In October 2003, the Administration commissioned a consultancy study to examine effectiveness of the long term asset supervisory framework and assess the need for further enhancements to protect policyholders in Hong Kong. By July 2008

The consultant has produced reports covering the overall study framework, review of the present asset supervisory regime, options for a long term assets valuation framework and safeguarding mechanism, public consultation strategy, etc.

Before proceeding with public consultation, the Administration researched on regulatory trends such as widespread adoption of risk based capital (RBC) regimes and a target set by the International Association of Insurance Supervisors to introduce Solvency II as a global RBC standard by 2010. Since these developments would entail a major overhaul of the present asset supervisory regime and interim measures have been put in place by the Insurance Authority to strengthen its monitoring capability, agreement was reached with the consultant to terminate the study with effect from 29 June 2007.

The Administration will monitor developments and international deliberations on the promulgation of Solvency II as a global RBC standard with a view to assessing its applicability to Hong Kong.

The relevant subsidiary legislation was approved in June 2007. The commencement notice was tabled at the LegCo meeting on 17 October 2007 for the Bankruptcy (Amendment) Ordinance 2005 to take effect on 10 December 2007.
