**Subcommittee on Land (Compulsory Sale for Redevelopment)  
(Specification of Lower Percentage) Notice**

**Profile of Old Buildings in Hong Kong**

**Purpose**

This paper outlines the profile of old buildings in Hong Kong and the likely changes in the coming decade.

**Background**

2. In Hong Kong, the design working life of an ordinary building is 50 years. The older the physical age of a building, the more likely it is fraught with building condition problems requiring attention over time. Rehabilitation will help extend the working life of buildings. Redevelopment remains an effective tool to tackle the problem of urban decay in the long run.

3. As at end 2009, there are about 41 000 buildings in Hong Kong, of which about 4 000 buildings are aged 50 years or above. The buildings aged 50 years or above account for 9% of the total number of buildings in the territory (**Annex I**).

4. A breakdown of the age of existing buildings by type is at **Annex II**. It is noted that residential/composite use buildings account for most of the building stock. As at today, the number of residential/composite use buildings aged 50 years or above is about 2 600.

5. Based on the records of the Buildings Department (BD), we estimate that over the next ten years, approximately an average 570 buildings per annum will reach the age of 50 (**Annex III**). It is estimated that the number of buildings in this category will rise from about 4 000 in 2009 to about 9 500 in 2019. Without proper repair and maintenance, the magnitude of urban decay is bound to grow much faster in the coming decade.

6. As the majority of buildings reaching 50 years of age in the coming decade are residential and composite commercial/residential buildings (**Annex IV**) in multiple ownership, to assemble owners' consent for redevelopment can be particularly difficult.

7. The Urban Renewal Authority ("URA"), established in 2001 to replace the former Land Development Corporation (LDC) as the public redevelopment agent, has been carrying out redevelopment projects to help arrest urban decay in Hong Kong. As at end 2009, the URA has directly, or through collaboration with the Hong Kong Housing Society (HKHS), commenced 37 redevelopment projects and four preservation projects (a list of all these projects is set out at **Annex V**). The URA has also inherited 10 already commenced redevelopment projects from the former LDC. Since its establishment in 2001, the URA has demolished/will demolish about 800 old buildings<sup>1</sup> for redevelopment in projects it has commenced. As the pace at which the URA has been carrying out urban renewal has been much slower than originally envisaged, there is a need to more actively involve the private sector in the urban renewal process. It is to be noted that the Land (Compulsory Sale for Redevelopment) Ordinance (Cap 545) is also the Ordinance that facilitates joint sale actions of the individual minority owners acting together.

8. While building age is certainly not a conclusive indicator for redevelopment, nonetheless, it remains a fact that older buildings are more prone to building maintenance problems. According to the BD's records, building repair orders served on buildings aged 50 years or above in Hong Kong (representing about 8% of all existing buildings) account for 19% of all building repair orders that the Department has served over the past five years.

**Development Bureau**  
**February 2010**

---

<sup>1</sup> The URA will have preserved a total of no less than 57 old buildings as well as various historic features, upon completion of the preservation projects and redevelopment projects with preservation elements.

## Annex I

### Age Profile of Buildings (as at 31 December 2009)

<b>Age</b>	<b>Number of Buildings</b>	<b>Percentage</b>
<10	5 814	14.0%
10 – 19	8 569	20.6%
20 – 29	11 148	26.7%
30 – 39	6 688	16.1%
40 – 49	5 712	13.7%
≥ 50	3 690	8.9%
<b>Total</b>	<b>41 621</b>	<b>100%</b>
