

Government's decision on the way forward in respect of public service broadcasting in Hong Kong and the future of Radio Television Hong Kong (RTHK). And the end of the **Government public consultation exercise on how the role and function of RTHK should be enhanced to achieve its mission as a public service broadcaster.**

Our opinion, how the role and function of RTHK should be enhanced to achieve its mission as a public service broadcaster as follows;

1. RTHK should try to give more accurate information to the public specially for all government related information. i.e.Housing Society's Sandwich Class Housing Scheme in detail such as how to apply, where to contact , as a public what kind of precautions should take, before enhanced the procedure.
2. In recent news we have to come to know that the Housing Authority is planning to sell the government apartments to the public however, the announcements has not yet been done. So we strongly recommend the RTHK to enclose such information to the public.
3. Introduce about Hong Kong's heritage, museum & most viewable places.
4. Introduce about the special foods & places near the most viewable places. For example Tin Shui Wai Wet Land Park, Lantau Monastery, The Peak, suppose, if somebody want to visit Tin Shui Wai's Wet Land Park. People prefer to know which restaurant is popular for what kind of food near by it.
5. Every district have special place to visit. Provide details about facilities, leisure, transportation, foods of those districts to public and also recommend some famous places.

6. Ethnic Minorities Radio program has very limited time slot. Such as Nepali radio program air once in a week for only 1 hour. It make the society's hot issue acquired by the RTHK is not update. Try to make it every day or extend longer time in a week so that public can manage to listen radio.
7. Enhance more educational program & language program. Ethnic minorities having language difficulties in Hong Kong. Try to make Cantonese language learning program or at least try to use or emphasis some Cantonese word or sentence in between the program will be more memorable for public.
8. Introduce Government trainings & its usefulness. Such as VTC, Construction Industries, ERB or some NGO's have new commencement courses. So that interested people can get benefit form it.

Warmest Regards
