

For Information

Legislative Council Panel on Commerce and Industry

The Applied Research Fund

INTRODUCTION

This information paper provides an update on the financial position of the Applied Research Fund (ARF) for the period of 1 September to 30 November 2011¹.

BACKGROUND

2. The ARF is a government venture capital fund of \$750 million set up in 1993 to provide funding support to technology ventures and research and development projects that have commercial potential. The Applied Research Council (ARC), a company wholly owned by the Government, was formed specifically to control and administer the ARF. The investments of the ARC fall into two categories: those which were processed by the then Industry Department before the engagement of venture capital firms in November 1998 and those which were managed by fund managers thereafter.

3. In 2003, the Administration reviewed the ARF in the context of the overall development framework for innovation and technology² and briefed Members on the result of the review³ in January 2005. The Panel agreed to the winding down of the ARF as proposed. Since then, we have been giving an update to Members on the operation of the ARF on a quarterly basis.

¹ At the Panel meeting on 11 December 2000, the Administration undertook to provide quarterly written reports on the progress of the ARF. This is the 43rd quarterly report.

² Paper ref. : CB(1)1470/03-04(05) titled "Strategic Framework for Innovation and Technology Development" discussed by the Panel on 13 April 2004 refers.

³ Paper ref. : CB(1)690/04-05(04) titled "New Strategic Framework for Innovation and Technology Development and Review of the Applied Research Fund" discussed by the Panel on 18 January 2005 refers.

LATEST DEVELOPMENT

A. Projects processed by the then Industry Department

4. The ARC approved 27 projects in this category with a total amount of \$97 million. As at end-November 2011, 23 projects were exited while 4 projects remained in this category. Among the remaining 4 projects, 1 project is in the form of equity injection and the other 3 projects are in the form of loans where the companies/guarantors of these cases are repaying the loans.

B. Projects funded through fund managers

5. A total of 24 projects were supported by the ARF through fund managers with approved funding of \$392 million. As at end-November 2011, 20 projects were exited while 4 are still active. Details of the 4 active ----- investments and their sectoral distribution are at **Annex**.

6. As at 30 November 2011, the valuation of all the 24 investments made by the fund managers was 54% of the corresponding total investment costs. In view of the financial difficulties facing some investee companies and that the investment climate for technology businesses in Hong Kong remains generally sluggish, our fund managers maintain a prudent view on the valuation.

CONCLUSION

7. Members are invited to note this paper.
