Miss Becky YU
Legislative Council
Hong Kong Special Administrative of the People's Republic of China

Dear Miss YU

We refer to your letter dated 6th of January, 2012, and would like to inform you that the size of photovoltaic panel can be reduced by 25% and thus saving HK \$ 2,000 for taxi and HK\$ 10,000 for mini bus. The photovoltaic panel for trucks cannot be reduced.

The estimated cost of repair and maintenance is that both Taxi and Mini Bus provide one (1) year warranty under normal use. After warranty period, the estimated cost for repair and maintenance of our system is as follow:

| | |
|----------|----------------------|
| Taxi | HKD 1,500 for 3years |
| Mini Bus | HKD 5,000 for 3years |

The mass production cost after photovoltaic panel is reduced by 25% and quantity estimated based on 1 year sale volume is as follow:

| | |
|----------|--------------------------|
| Taxi | HKD 29,000 (min.5000pcs) |
| Mini Bus | HKD 90,000 (min.2000pcs) |

Please do not hesitate to contact me if further information is required.

Yours sincerely,

Eric Cheng (Prof.)
Department of Electrical Engineering
