Date: Saturday, October 22, 2011 10:42PM
Subject: WHO database of RSP PM2.5 and PM10 particulates with Hong Kong data included (excludes Causeway Bay and Mongkok PM2.5)

History: ↪ This message has been forwarded.

Dear Legco Panel on Transport

PM2.5 and PM10 particulates

See how Hong Kong stacks up in the world pollution wise according to this WHO spreadsheet.

Pls see the attached PM2.5 and PM10 WHO charts with Hong Kong data (source HK EPD) inserted .

The Causeway Bay and Mongkok roadside data remain hidden by the EPD since they are obviously worse than Central Roadside levels.

Nose-to tail old polluting pre Euro and Euro 1 and 2 buses running 90% empty outside of rush hours as well as inefficient old diesel trucks are a major contributor to roadside pollution levels.

We need hybrid electric buses in Hong Kong because of the hilly topography.

We need electric shuttles in the designated Causeway Bay, Mongkok and Central Low Emission Zones running between termini outside these areas where passengers transfer at no additional Octopus charge onto the shuttles.

Kind regards,

James Middleton

Chairman
