LegCo Complex resumes water supply (with photo)

The disinfection work for the water supply system in the Legislative Council (LegCo) Complex has been completed and the water supply in the Complex has resumed normal at 7:30 am this morning. As a precautionary measure, the LegCo Secretariat has installed filters on the water taps in the pantries of the LegCo Complex. The Centre for Health Protection will systematically take water samples from different locations of the water supply system of the LegCo Complex for testing. It is expected that the result of the testing will be available in ten days.

Ends/Thursday, January 5, 2012
