Subject: Bills Committee on Air Pollution Control (Amendment) Bill 2013

Dear Sir/Madame,

I hope this is the right email address for submission -

I urge you to amend the Air Pollution Control Bill! The old objectives are completely outdated.

Hong Kong cannot claim to be a first world country with pollution levels, that kill thousand of people every year!

If air pollution levels will not come down soon I will leave from Hong Kong after being a 15 year resident.

And I know many people who intend to do the same because of serious health concerns.

Regards,
