**Motion on
“Developing a new North Lantau”
moved by Hon CHAN Han-pan
at the Council meeting of 6 February 2013**

**Motion as amended by Hon Ronny TONG, Hon Tony TSE, Hon Alice MAK,
Hon YIU Si-wing and Dr Hon KWOK Ka-ki**

That, Hong Kong develops rapidly, with North Lantau having been developed into an area with considerable development potential in tourism as well as convention and exhibition industries; as further planning for North Lantau is underway and a number of major infrastructure projects in North Lantau, including the Hong Kong-Zhuhai-Macao Bridge (‘HZMB’), a new control point at HZMB, the Tuen Mun-Chek Lap Kok Link and a third runway at the airport, are in progress, and the Administration is conducting a Planning and Engineering Study on the Remaining Development in Tung Chung, this Council urges the Administration to extensively consult various sectors on the development of North Lantau, and under the principle of balancing conservation and development and through holistic planning, improve North Lantau’s internal and external transport links, make good use of control point facilities to develop a ‘bridgehead economy’, which should include studying the opening up of the SkyPier inside Chek Lap Kok Airport for use by non-airport passengers to enable tourists and local residents to travel by water to tourist attractions in Lantau Island and Tung Chung to promote district economy, so as to develop Tung Chung into a key area of tourism as well as convention and exhibition services, and a vibrant community with local characteristics which is good for living, doing business and leisure activities, and capitalize on the opportunities arising from the North Lantau development to actively implement a ‘local professions first’ policy and create employment opportunities, so as to drive the economic development of Hong Kong; this Council also urges the Administration, when formulating planning proposals on the development of North Lantau, to involve actively not only the Development Bureau but also other relevant Policy Bureaux, including the Transport and Housing Bureau, the Home Affairs Bureau and the Environment Bureau, and to preserve valuable features of the district economy and culture and ensure their sustainable development; specific measures should include:

- (1) to expeditiously develop Tung Chung West, including constructing an extension of Tung Chung Line, setting up an MTR station for Yat Tung Estate, conducting a study on lowering the fares of the Tung Chung

Line, and launching reasonably-priced monthly tickets on a zonal basis for the Tung Chung Line;

- (2) to study the development of 'on-street economy', including setting up a Tung Chung bazaar or night market and implementing a local dual economy, so as to provide small business operators with development opportunities and residents with more diversified shopping choices;
- (3) to avoid monopoly by large consortia, and build more public markets managed by the Food and Environmental Hygiene Department to provide local small business operators with stalls at relatively low rents, and provide residents with inexpensive consumption choices to alleviate their burdens of the costs of living;
- (4) to abolish the toll for Lantau Link to increase residents' outbound mobility;
- (5) to set up training colleges and educational institutions which match the mode of local economic development;
- (6) to build coastal cycle tracks in North Lantau and provide bicycle ferry services to facilitate residents go by bicycle to and fro Sunny Bay, Park Island and Tsuen Wan, and develop green and low-carbon transport; and
- (7) to ensure sufficient healthcare personnel, so that the North Lantau Hospital due for completion soon can offer comprehensive healthcare services and come into operation as early as possible;

this Council also urges the Administration to allocate land for constructing large shopping areas with retail and wholesale functions, build more hotels, expedite the expansion of the Hong Kong Disneyland, perfect the support facilities of AsiaWorld-Expo and provide adequate parking spaces; besides, before developing new communities in Tung Chung and implementing concrete planning for increasing the population in North Lantau, the Administration must fully consult the residents to forge consensus, and implement the following measures:

- (8) to strictly restrict the building height and density in Tung Chung new development areas to avoid the emergence of screen-like buildings and the heat island effect, which affect Tung Chung residents' health;
- (9) to ensure that when the North Lantau Hospital commences service, its accident and emergency department can immediately operate round the

clock, and it can provide comprehensive specialist out-patient and in-patient services;

- (10) to study the development of eco-tourism, opening-up of monuments and heritage trails, establishment of berths, and building of water sports centres and relevant commercial support facilities in North Lantau; and
- (11) to build a new standard outdoor sports ground in the Tung Chung area to provide residents with a sports venue.
