

Panel on Environmental Affairs

Subcommittee on Issues Relating to Air, Noise and Light Pollution

**List of follow-up actions arising from the discussion
at the meeting on 12 July 2013**

At the meeting on 12 July 2013, the Administration was requested to –

- (a) provide information on the current regulations on excessive street lighting at district level and reflected glare from glass curtain walls; and
- (b) give views on the suggestion that a comprehensive approach should be adopted in vetting and approving the installation of external lightings (e.g. advertisement signboards, decorative lightings, spot lights, video walls, display panel, etc.) so that lighting intensity and flashy light etc., which could cause light nuisances to residents nearby, could be taken into account.
