4th June, 2013.

Dear Ms. Ho,

Re.: Hong Kong blueprint for sustainable use of resources'

On behalf of the French Chamber of Commerce, we are writing to you regarding the 'Hong Kong blueprint for sustainable use of resources' recently issued by the Environment Bureau.

This document featuring the Hong Kong Challenges and Opportunities were presented by Ms. Christine Loh during an event organised by the French Chamber on 23rd May, and the presentation done on that day won the consent of all members present.

We understood that now that the government has set the targets & roadmap for action, it now needs the business side participation and commitment to make the change.

This is the reason why the French Chamber confirms by the present letter that it strongly supports the Environment Bureau guidelines, and that it:

- + supports the overall direction recommended,
- + backs the targets raised,
- + recognises the urgency of addressing these pressing issues,
- + encourages the collective plans and measures proposed, including municipal solid waste charging scheme, landfill extensions, integrated waste management facilities, organic waste treatment facilities

Yours respectfully,

Nicolas Borit
 President
 French Chamber

Kin Kan Chan
 President
 Green Business Committee

C/C: Dr. Christine Loh, Under Secretary for the Environment
