Subject: Complaint about the poor traffic for green minibus 27 from shatin to science park during peak hours

Dear Sir/Madam,

Recently, I observed that there are many people who are prolonged waiting for taking green minibus 27 from shatin to science park from 8:00am to 9:30am and from 6:30pm to 7:30pm. The length of lining up can be more than over 15 minibus so as to digest the line up. And, there is a case the line up starting from minibus stop but up to the bridge's up entrance last week. Compared to several months previously, the problems greatly becomes serious and causes our inconvenience pretty much especially the workforce kept increase due to the current construction of phase III in science park.

I have tried for many different periods between 8:00am and 9:30am. The problem still arises during the peak hours. I think there should be a motivation for minibus operator to reduce the number of minibus in order to maximize their profit. At this point, I hope that your council will try to investigate and take a prompt action to solve the traffic problem. Many thanks.

Regards,  
Lok
