Dear Panel Member,

I am concerned with the proposed incinerator at Shek Kwu Chau.

With waste: "scale of economy" can be misleading as an argument for the mega-incinerator. It should not be the goal.

Each neighborhood should handle its own to reduce trash and ash through our streets and waterways, including my own. A mature society has communities that do their own part for the good of all.

Please help give such viewpoints enough time to be understood by the community before a mega-project gets shoved through.

Thank you kindly,

Sylvester Wong I
