**Shek Kwu Chau**

Steve Quilkey to: panel\_ea@legco.gov.hk

20/03/2014 18:45

Dear Honorable Members.

I believe this letter may be a little late but have been unable to submit earlier and trust it can be considered by the panel.

My family and I would implore you to do everything possible on the 22nd March to stop this unsustainable, environmentally disastrous and outrageously expensive plan to build an Super Incinerator using outdated and toxin producing(both air and ash waste) technology on reclaimed land to be built in unspoilt ocean next to Shek Kwu Chau.

Just the rubbish and highly toxic fly ash that falls into the ocean from the proposed barges (no one can possibly ensure it will not, ever seem the mess at the paper recycling port at Chai Wan...shocking!) will destroy the waterways and beaches of Lantau and surrounding Islands.

We are sure you would know there are far better alternatives like completely integrated recycling plants and Plasma Arc incineration that will reduce Hong Kong's waste through proper recycling and non-toxic incineration. Sadly the EPD seems blind to all alternatives and determined to proceed no matter what with scant concern for the environment they are supposed to protect. Hong Kong has enough pollution and environmental problems without adding to them at great expense to the taxpayers who will then have to suffer from more toxic pollution.

Please do your best for Hong Kong, it's people and environment and particularly that of the Outer Islands.

Thank You.

Yours Sincerely,

Steven Quilkey ( ) and family

Tong Fuk, Lantau
