IWMAG Supp Submission Legco Panel Environ 20140325 FINAL with Figs CHI.pdf

Dear Members of the Panel on Environmental Affairs

DO NOT BE FOOLED BY KS WONG - he claims we have a crisis and cannot delay BUT his solution is to select a site the does not exist when alternatives are available.

He cannot have it both ways - if we have a crisis that requires immediate action do not waste 3 years reclaiming the site. If we can wait for reclamation we do not have a crisis so can consider alternative measures such as recycling. Either way Shek Kwu Chau is wrong and should be delinked from landfill extension plans.

Attached is the our supplementary submission provided at the invitation from the Chair of the EA Panel offered during the meeting on Sat 22 March.

On behalf of the Integrated Waste Management Action Group (IWMAG).
