I am a teacher at Lantau International School in Tong Fuk, South Lantau. I teach year 3 and we are all distressed and unhappy about the possible incinerator that is planned. I teach the children about caring for the environment and making the right choices. I hope you will make the right choice of choosing different technology to solve the rubbish problem in HK. We all at Lantau International School urge you to consider our point of view. We live and go to school in one of the most beautiful parts in Hong Kong. Please please don't ruin it. There is an alternative, please choose the right thing for the next generation.

I have copied the children in P3b's comments for you below.

Thank you for your time.

Charlie Ko
Year 3 teacher.
Lantau International School.

Freya: PLEASE , PLEASE ,can you find another way of doing this kind of rubbish thing please. I do not want the mega incinerator to ruin the sea because I love the sea. Do you like Hong Kong??

Liam: Do you care about Hong Kong? Cause if you do please don't build the mega-incinerator on Shek Kwu Cha. You might spill rubbish in the sea and you'll pollute the air.

Amelie. Please don't build the incinerator in that beautiful island. It will pollute the air and make people sick and do some global warming and it will make polarbears extinct. Please don't do it The rubbish on the boats will maybe fall into the sea and it will wash up on Tong Fuk and Pui o beach. Maybe you could make the rubbish into fuel?

Haydn: Please use different technology.

Fiona: Please do not make an incinerator because it has not good for you. You can get cancer by the incinerator by the smokes. And of you make an incinerator you are making the air pollution worse.

Rachel: Please change your mind, We don't want to live in rubbish. Thank you.

Darren: Please stop thinking of the incinerator and change it to a technology that can make plane fuel. Do you care about Hong Kong?

Avaneesh: Please stop making the incinerator. Please.

Natalie: Please stop making the incinerator because the smoke is coming and people might get cancer. PLLLEEEEEAAAASSSSEEEEE!

Piper: Please stop the incinerator. All the animals are going to lose their home. Why don't you use different technology to make airplane gas.

Rithy: Please government stop the incinerator on Shek Kwu Chau or we will die. And don't thrash our beautiful place.

Patty: Hi I am Patty from L.I.S. Please do not make Shek Kwu Chau to a incinerator PLEASE.

Deaken : Hi my name is Deaken from L.I.S. Please stop this from going on this beautiful island.

Audrey : PLEASE don't build the incinerator if you do you will destroy that beautiful island and also don't cut trees from the island

Caitlin please stop the mega incinerator because if it is built we will soon live in rubbish on South Lantau.

Piper. Please stop the incinerator as all the animals are going to loose their home. Why don't you use the rubbish to make Airplane fuel.

Alex. Please stop this it could pollute the air.

Luke. Please don't build the incinerator. it is very bad you can use the garbage for airplane fuel. This kids generation is very important. Please don't ruin Lantau for us please!

Mariella

Please, please don't build this incinerator. The smoke will rise and everyone will smell it and then get sick and they might get cancer. From my house I can see that island very clearly so please don't build the Shek Kwa Chau make a incinerator
