Submissions for Third Runway Project

Our company strongly support the proposal for the construction of the Third Runway at Hong Kong International Airport. Provided that all requisite environmental and financial feasibility assessments are satisfied, the project should proceed as soon as practicable.

The Third Runway will enable Hong Kong to continue its regional leadership in air connectivity, which is vital in maintaining the Special Administration Region's economic growth, competitiveness and employment.

We submit the above in support of the proposal from the Airport Authority to construct the Third Runway and plead for the Panel on Economic Development to adopt the same.
