Hong Kong Aircraft Engineering Company Limited

**Subcommittee to Follow Up Issues Relating to the Three-runway System at the  
Hong Kong International Airport -  
A Written Submission from HAECO**

Hong Kong Aircraft Engineering Company Limited (“HAECO”, Stock Code: 00044) supports the expansion of the Hong Kong International Airport (“HKIA”) into a three-runway system (“3RS”) by the Airport Authority Hong Kong (“AAHK”).

Being an integral part of the HKIA, HAECO sees the need to ensure the continuous development of HKIA in order to meet Hong Kong’s long-term air traffic demand. Expanding HKIA into a 3RS will strengthen Hong Kong’s status as an international aviation hub. Besides, the 3RS will boost Hong Kong’s economic development and generate economic benefits, thereby helps maintain Hong Kong’s overall competitiveness.

A handwritten signature in black ink, appearing to read "Ronald Lam", written over a horizontal line.
