Subject: Electricity Supply Survey in Markets of Kowloon.

Dear Mr. Ho, Mr. Wu, Mr. Cheung, Miss Kwan and Miss Nam,

Re : Electricity Supply Survey in Markets of Kowloon.

I refer to my previous E-mail for the captioned subject.

Attached please find the summary of the measurement survey for electricity supply for stall tenants for your consideration.

Please note the following points for the captioned measurement.

1. The available electricity supply, as specified in Column (C), is assumed as 80% of the total rated electricity supply for safe and nominal operation for avoiding over-loading situation. In addition, loading over 80% of rated supply might be prone to over-heating problem in the power switch.
2. The measured data during peak hours, as specified in Column (D), is just the transient value and might not necessary be the actual maximum consumption. Therefore, the proposed spare power capacity, as specified in Column (E), shall be carefully reviewed with a certain safety factor when de-freezing vacant stalls.

By copy of this E-mail to Miss LEE, HI(MM)YT, the measurement data for Ya Ma Tei Market and Kwun Chung Market has to be "re-measured" again this afternoon for a more reliable result. The measurement data would be submitted by tomorrow.

Best Regards,
Jeff TSE

**Request for upgrading the infeed power supply in
Kwun Tong Ferry Concourse Cooked Food Market,
Tsun Yip Cooked Food Markets and Tung Yuen Cooked Food Markets in Kwun Tong**

I attached herewith the summary survey for electricity supply for markets of Kwun Tong district as conducted by EMSD staff in August 2009.

2. As stated in EMSD's survey, there is insufficient electricity power encountered in three cooked food markets as captioned. In this connection, I should be grateful if you would advise us the feasibility and the estimated cost for the upgrading the infeed power supply to these three cooked food markets.
3. For further information or another site inspection is required, please contact my Health Inspector, NAM Shuk-kam at 3102 7327 or the undersigned.

Dear Sirs,

Kwun Kong Ferry Concourse Cooked Food
Wing Yip Street, Kwun Tong
Increase in demand of Electrical Load

We refer to your letter ref.: () in ASD.PB.PC-019-00366-000 Pt. 3 and would advise you that an indoor substation is required for the provision of additional electricity supply to the above premises. The property owner is required to provide us a transformer room of 8.0m(L) x 5.5m(W) x 3.6m(H) internally to house our high voltage plant and equipment for the provision of electricity supply.

A typical substation layout drawing is enclosed for your reference.

Should you have any queries on the above, please contact our Mr. M. C. Kwan on telephone number 2678 9031.

Yours faithfully,
for and on behalf of

Subject Electricity Loading of Kwun Tong Ferry Concourse Cooked Food Market and Tsun Yip Cooked Food Market.

Dear Mr. WONG,

This is to further our tele-conversation in late December, 2010. I should be grateful if you could study and advise this department the electricity loading of our Kwun Tong Ferry Concourse Cooked Food Market and Tsun Yip Cooked Food Market. In addition, please also advise this office if there is insufficient electricity power for the captioned markets encountered in Year 2010. Your reply to me at your earliest convenience is much appreciated.

Should you need further information, please contact me at 3102 7328 or [REDACTED]. Thanks.

Regards,

Nancy YIU
Health Inspector / FEHD

Subject 回覆: Electricity Loading of Kwun Tong Ferry Concourse
Cooked Food Market and Tsun Yip Cooked Food Market.

Dear Ms. Yiu,

I refer to our telecon in Dec 2010 and your below email for the captioned

An ad-hoc electricity measurement has been done in around Aug 2010 for the captioned 2 cooked food markets. We discovered that:

1) Tsun Yip Street Cooked Food Market

- The electricity loading for a MCB board at 1/F (200A rating) was already around 200A.

2) Kwun Tong Concourse Cooked Food Market- The electricity loading for one of the MCB boards at G/F (100A rating) was already around 97A.
- There were a few MCB tripping cases in last summer due to slightly overload.

From the above result, the electricity loading for the above MCB boards already reach their design capacity. So, re-arrangement of loading in the electrical distribution system is recommended. In view that this involves design work and major alternation to the electrical distribution system, ArchSD seems the suitable party for the work.

Should you have any further enquiries, please feel free to contact me. Thank you.

Regards,
Alex WONG

主旨: Electricity Loading of Kwun Tong Ferry Concourse Cooked Food Market and Tsun Yip Cooked Food Market.

Dear Mr. WONG,

This is to further our tele-conversation in late December, 2010. I should be grateful if you could study and advise this department the electricity loading of our Kwun Tong Ferry Concourse Cooked Food Market and Tsun Yip Cooked Food Market. In addition, please also advise this office if there is insufficient electricity power for the captioned markets encountered in Year 2010. Your reply to me at your earliest convenience is much appreciated.

Should you need further information, please contact me at 3102 7328 or [REDACTED]. Thanks.

Regards,

Nancy YIU
Health Inspector / FEHD

Dear Mr. WONG,

So sorry to bother you !

In view of the captioned need, we have sought ArchSD on expert advice of the track we should go. In return, we were given to know that an indoor transformer room is required to house the high voltage plant and equipment.

Due to the limited spaces in both cooked food markets, we are unable to squeeze additional space for doing so. In this connection, I should be grateful if you would offer expert advice on any alternatives we may attempt, please.

Many Thanks!

Dear Mr. CHAU,

Further to my memos dated 26.5.2010 as attached

Memo to ASD Tsun Yip CFC -updating electricity.doc Memo to ASD KT Ferry -updating electricity.doc

I was given to know in your reply memo in July that only installation a

new transformer rooms in the captioned markets is the way to tackle the problem.

In view of the space constraint in the captioned markets and frequent electricity tripping incidents encountered recently, I should be grateful if you would study with CLP on feasibility of upgrading the existing incoming cow cable so as to solve the problem of insufficient electricity power encountered in these 2 CFMs.

Thanks a lot!!

Subject: Upgrading electricity supply at Kwun Tong Ferry Concourse CFM and Tsun Yip CFM

Dear Mr. MA,

Regarding upgrading electricity supply at Kwun Tong Ferry Concourse Cooked Food Market and Tsun Yip Cooked Food Market, we have consulted our maintenance agent, EMSD and learned that the MCB board has already reached its rating and major alternation to the electrical distribution system is required. Please kindly refer to EMSD's reply as attached.

Upgrading the infeed power supply in Kwun Tong Ferry Concourse and Tsun Yip Street Cooked Food Market-2011_09_02.pdf

As such, grateful if you would advise us on the feasible measures in upgrading electricity supply at Kwun Tong Concourse CFM and Tsun Yip CFM and their estimated cost, please.

Should you have any enquiry, please contact me or Health Inspector Mr. CHAN at 3102 7328.

Dear Jimmy,

Sorry for belated reply.

From our previous reply on 20/1/2011, it is noticed that one of the MCB board is already reach its rating. As such, the re-arrangement of electricity loading of electrical distribution may be required. In view that the matter is related to design work and major alternation to the electrical distribution system, ArchSD seems the suitable party for the work.

In this sense, it is appropriate to approach ArchSD for further advices / comments.

Thank you.

 Cc: Ivy CW TSANG/FEHD/HKSARG@FEHD, Sze Man CHAN/FEHD/HKSARG@FEHD, Wai Man 2 CHAN/FEHD/HKSARG@FEHD

Dear Mr. LUI of Arch. SD,

With regard to the caption, this department has discussed with your section over few years but not to solve. We still did nothing on the power supply of the alleged venue in response to The Ombudsman's comment on vigilance against power usage situation in FEHD Markets in 2009.

Over the years, it was noted that China Light Power Co. (CLP) requested us to set up a new transformer in each Tsun Yip Street Cooked Food Market (TYSM) and Kwun Tong Ferry Concourse Cooked Food Market (KTFM) in order to increase the power supply from 480A/3-phase to 550A/3-phase and 240A/3-phase to 260A/3-phase respectively. In view of our limited spaced provided in both TYSM and KTFM, there is no addition space or suitable location for the construction of a transformer room for above addition. So sad, we can not accept the proposed addition in the Markets to cater the increase in demand of electricity.

According to EMSD's report on electricity supply situation of TYSM and KTFM in Jan/2011, the gist is depicted as:-

TYSM -- the electricity loading of MCB board at I/F (200A rating) was already around 200A and few MCB tripping cases in 2010 due to slightly overload.

KTFM -- electricity loading of one of the MCBs at G/F (100A rating) was already around 97A.

As such, grateful if you can offer your expert comment on the feasibility of addition of cow power cable, upgrading the MCB boards and electrical distribution system or other probable ways in both TYSM and KTFM. Is it possible to take any renovation works in our Markets to increase the maximum power supply capacity a little bit, other than addition of new transformer. Providing that this department will not carry out any A/C

retrofitting work in both Markets, should the additional required power load be decreased greatly from your estimated 2000kVA and 400kVA in TYSM and KTFM respectively.

Should you require further information, please don't hesitate to call me direct at 3102 7326.

I am looking forward to your good news.

Re: Increase in demand of Electrical Load

Reference is made to your letter WE/L/100341/10-12MCK dated 15 December 2010. Due to the limited space in the captioned market, there is no additional space available for the construction of a transformer room. In this regard, I should be grateful if you could re-consider the requirement of a transformer room could be waived by using other alternative as to cater for a 400kVA load due to the addition of air-conditioning of the stalls. Meanwhile, I should be grateful if you could advise me whether there is still available capacity of the existing electricity supply so that the required 400kVA could be reduced.

I should be grateful if I could have your reply by 16 February 2013.

Yours faithfully,

(K. F. LUI)

Dear Mr. LUI,

I got to know you have issued a letter to CLP on 20.3.2013 for seeking alternative ways to upgrade the maximum output of electricity power supply in the captioned Markets, other than build-up a new transformer within the Markets venue.

Grateful if you can keep me informed of the latest progress and any reply from CLP.

Should you have any enquiries, please call me direct at 3102 7326.

Dear Sirs,

Tsun Yip Street Cooked Food Market
Tsun Yip Street, Kwun Tong
Increase in demand of Electrical Load

We refer to your letter ref.: () in ASD.PB.PC-019-00365-000 Pt. 5 and would advise you that an indoor substation is required for the provision of additional electricity supply to the above premises. The property owner is required to provide us a transformer room of 12.0m(L) x 5.5m(W) x 3.6m(H) internally to house our high voltage plant and equipment for the provision of electricity supply.

A typical substation layout drawing is enclosed for your reference.

Should you have any queries on the above, please contact our Mr. M. C. Kwan on telephone number 2678 9031.

Yours faithfully,
for and on behalf of

Re: Request for rearrangement of fuse switches of stalls

Reference is made to your MUR and our(KWOK/LUI) subsequent tel-conversation regarding the captioned.

2. As you are informed via my same series memos dated 18 July 2013 and 30 January 2014 that the captioned rearrangement is a major renovation works in relation to the electrical distribution of the existing electrical installation whereas the electricity capacity of the market has reached its maximum nominal capacity; It is recommended to have upgrading work for the electricity power supply prior to the said major renovation works to be carried out. As far as the upgrading work is concerned, CLP just requested supporting information for her review of the electricity upgrading work via her mail as attached copy. In this connection, I should be grateful if you could give reason for the limited space for the provision of a transformer room in response to item 1) and provide the electrical load of the existing installations of each stall and the new installations to be added by the tenants for each stall.

3. The wall between the store and existing switch room (see attached sketch no. KTFCCFM/SK171014-01) will be dismantled to facilitate the upgrading works and your confirmation is also required.

Kwun Tong Ferry Concourse Cooked Food Market
Re: Increase Electrical Power Supply

I refer to your MUR.

2. With regard to the caption, this Department has discussed with your section over few years but not to solve. We still did nothing on the power supply of the alleged venue in response to the Ombudsman's comment on vigilance against power usage situation in FEHD Markets in 2009. According to the survey conducted by EMSD years ago, the power supply in Kwun Tong Ferry Concourse Cooked Food Market was required to be increased from 240A/3-phase to 260A/3-phase for avoiding over-loading situation.

3. As advised by CLP, this Department should provide a transformer room to house the high voltage plant and equipment for the provision of electricity supply at the venue. However, in view of all market stalls in cooked food market have already fully occupied, we cannot spare sufficient area for a new transformer. On the other hand, the electricity usage in each stall were provided and appended herewith for your kind consideration and onwards to CLP. Instead of the construction of new transformer, grateful if you can explore with CLP for upgrading power cable to provide more 20A/3-phase at least.

4. Regarding the proposed upgrading works for dismantling the wall between the store and existing switch room at G/F of the Market, we have no objection to such alteration. Nevertheless, grateful if you can provide the cost estimation to the above work for our seeking of funding.

5. Should you have any problem, please don't hesitate to contact me.

Dear Mr. LUI of Arch SD,

Your email below refers.

Grateful if you would advise this Department of the present progress of the captioned. In view of your Department has been dealing the case with CLP for few years but in vain, the District Councillor, CHAN Wah-yu, Nelson MH requested the "Market Management Consultative Committee of Tsun Yip Street Cooked Food Market & Kwun Tong Ferry" (the MMCC) to invite Arch SD to attend the coming meeting to make clear the case. The meeting of MMCC will be held on 12.12.2014 (Friday) at 10:00am at Conference Room, 7/F, Shui Wo Street Municipal Service Building, Shui Wo Street, Kwun Tong. So that, you are cordially invited to join the coming MMCC.

Should you have any enquiries, please feel free to contact me direct.

Re: Increase in demand of Electrical Load

Reference is made to the email sent on 8/10/2014 by your Mr. CHAN as attached and the subsequent tel-conversation held between Mr. CHAN and the undersigned today regarding the captioned. Please find my reply as follows for your consideration of the increase in electrical power supply for the captioned market.

a) No space for Tx Room – Director of Food and Environmental Hygiene advised this department recently that they cannot provide spare and sufficient area for the construction of a new transformer room in the market because all market stalls are fully occupied.

b) Proposed location layout for CLP Equipment Installation (e.g. Cutout) - please find attached sketch no. KTFCCFM/SK-051214/01 to 02 showing the location for the incoming cutout for the captioned. The wall of store adjacent to the existing switch room shown in sketch no. KTFCCFM/SK-051214/02 will be dismantled (subject to Structural Engineer's final comment) to facilitate the new incoming cutout.

c) Consolidation of the addition loading - The additional load of 3 phase power supply is 230kVA.

Yours faithfully,

(K. F. LUI)

Re: Inadequate Electricity Supply

You may wish to note that Audit Commissioner released its latest Audit Report (No. 64) on 22.4.2015 to the Legislative Council and the Public. Among others, Audit pointed out the electricity supply of the captioned Cooked Food Market did not meet our current 60-ampere standard and could not catch up the demand on electricity from the tenants at there. It may result in fire risk and power outages from overloading.

2. Now, Audit recommended this Department to look into the reasons for inadequate electricity and expedite the upgrading work on electricity supply. Grateful if you can speed up the liaison work with CLP and provide the feasibility report with cost estimation for our arrangement of funding.

3. Should you require further information or site-inspection, please feel free to contact the undersigned or our Health Inspector, Mr. C.F. HO at 3102 7328.

(KWOK Chi-wai)

Kwun Tong Ferry Concourse Cooked Food Market
Re: Inadequate Electricity Supply

I refer to the joint site inspection among your Department, CLP and this office on 7.5.2015. It was noted that there is no suitable site within our venue for addition of new transformer room in order to supply a stable power source to the captioned building. Thus, CLP supported the proposal to provide the extra power cable to the above Cooked Food Market with 400-Ampere. It would be viable and efficient way to solve the inadequate electricity supply of above. Surely, the other associated facilities as set up of a new switch room, rearrangement of fuse switches of stalls etc. must be arranged.

2. In response to the proposal of addition a new power cable, grateful if you can confirm whether the work is feasible or not. If so, please provide the details of your proposed works with cost estimation for our arrangement of funding, and issue an application to CLP for lining a new power cable to the captioned Cooked Food Market.
3. Should you require further information, please feel free to contact the undersigned or our Health Inspector, Mr. C.F. HO at 3102 7328.

(KWOK Chi-wai)

for Director of Food and Environmental Hygiene
