# Legislative Council Panel on Constitutional Affairs 

## Voter Registration

## INTRODUCTION

This paper briefs Members on the key statistics relating to the 2014 Final Register ("FR") of electors and the checking measures taken in the 2014 voter registration ("VR") cycle, as well as the preparation for the 2015 VR cycle.

## 2014 VOTER REGISTRATION CYCLE

2. For the 2014 VR cycle, the statutory deadlines for new registration and updating of registration particulars fell on 16 May and 29 June 2014 respectively. The Registration and Electoral Office ("REO") subsequently published the 2014 FR on 25 July. The key statistics are set out in the ensuing paragraphs.
(I) Geographical Constituencies ("GCs")

Newly registered electors
3. About 3.5 million registered electors are contained in the 2014 FR of electors for GCs, representing a registration rate of $73.5 \%$. Amongst these electors, about 77000 are newly registered. About 41000 electors have been deleted from the 2013 FR, of whom about 27000 electors have passed away and about 14000 electors have failed to update or confirm their residential addresses in response to the REO's inquiry process. The figure in the 2014 cycle represents a net increase of more than 36000 electors when compared with the 2013 FR.
4. The registration rate in respect of the 2014 FR is comparable with the rates in 2013 (73.2\%) and 2012 (73.6\%). According to past experience, the overall registration rate in a non-election year is usually slightly lower than that in an election year. As 2015 is a District Council election year, it is expected that the registration rate in the 2015 VR cycle will rise.

## Registration rates of different age groups

5. In addition to the traditional publicity channels to encourage eligible persons to register as electors, the REO continued to disseminate the VR message to the public through social media to appeal to young people to register as electors. As a result of the publicity efforts over the years, the registration rate of eligible young people aged 18-30 has risen steadily from $50.7 \%$ in 2007 (District Council election year) to about $59.7 \%$ in the 2014 cycle. The average registration rate of electors of other age groups is over $75 \%$ and relatively stable. Further details of the age and sex profile of registered electors of different age groups by Legislative Council GCs and Districts in 2014 are set out in the tables at Annex 1.

## Updating of registration particulars

6. Similar to the case of new registration, usually fewer applications for updating registered particulars are received in a non-election year when compared to a cycle with a major election. In the 2014 cycle, the REO processed about 121000 applications for updating registration particulars from electors. The figure is slightly higher than the number of updating cases of about 116000 in 2013. As 2015 is an election year, we expect the number of cases of updating of registration particulars will increase.
7. To address registered electors failing to update their particulars after moving their residence, the REO will continue to strengthen its publicity efforts to encourage and remind registered electors to update their registration particulars in a timely manner in order to enhance the accuracy of the voter registers.

## (II) Functional Constituencies ("FCs")

## Traditional FCs

8. For the 2014 FR for traditional FCs, the number of registered electors is about 232700 , of whom about 600 are newly registered. On the other hand, about 3200 electors have changed to register under the District Council (second) FC and another about 2700 electors have been deleted. The number of traditional FC electors in the 2014 FR represents a decrease of about 5300 electors compared with the 2013 FR.
9. The number of registered electors of the District Council (second) FC in the 2014 FR is about 3.25 million, representing an increase by around 31000 electors when compared with the 2013 FR. Among these 3.25 million electors, about 73700 are newly registered electors, including about 1100 GC electors in the 2013 FR, some 3200 electors who have switched from other FCs and the remaining 69400 electors who are newly registered GC electors. Separately, in the 2014 FR, there are also about 39700 electors who have been deleted (mainly electors who have passed away or GC electors who have been deleted under the inquiry process), about 2400 electors who have decided not to be registered as electors in District Council (second) FC again and some 200 electors switching to other FCs.
10. A table showing the distribution of registered electors by FCs (other than District Council (second) FC) in 2014 is at Annex 2. Other statistical information is available at the VR website (www.voterregistration.gov.hk).

## (III) Checking Measures

11. The Government attaches great importance to maintaining the integrity, fairness and openness of the electoral system, and adopts various measures to ensure a high degree of transparency, the integrity and accuracy of the VR system. To enhance the accuracy and completeness of the registration particulars of electors, the REO continued to implement checking measures in the 2014 cycle including verification checks on electors' registered residential addresses through cross-matching of data with the Housing Department, the Hong Kong Housing Society and the Home Affairs Department; checks on multiple electors or multiple surnames of electors registered with the same residential address; random sample checks on electors contained in the 2013 FR; checks on addresses with incomplete information, commercial addresses or suspected non-residential addresses; follow-up action on undelivered poll cards arising from the District Council by-elections in 2013 and 2014; checks on addresses in buildings already demolished or to be demolished; and sample checks on new applications for VR. The number of GC electors covered by various measures is more or less the same as in the preceding cycle. After checking, the REO issued inquiry letters to about 24000 electors according to the electoral laws and requested these electors to update or confirm their registered residential address. Subsequently, about 14000 electors did not respond to the

REO's written inquiries. Their registration status was then removed and they were not included in the FR published on 25 July 2014.

## 2015 VOTER REGISTRATION CYCLE

12. On 10 July 2014, the Legislative Council passed the Electoral Legislation (Miscellaneous Amendments) Bill 2014 which included advancing the deadline for VR application for GCs, FCs and Election Committee Subsectors by 14 calendar days, in order to provide ten more calendar days to the public for inspecting the provisional register and the omissions list and making claims and objections, and four more calendar days to the Revising Officer for arranging hearings for claims and objections. The new deadlines have already taken effect in the 2015 VR cycle. Thus, according to the relevant existing electoral laws, eligible persons who would like to register as electors but have yet to do so must submit their applications on or before 2 July 2015 so that their registration particulars can be included in the FR to be published in September 2015. As for registered electors, if there is any change in their registration particulars, such as residential address, they should report the change to the REO on or before 25 August 2015. We plan to start the next VR publicity exercise in May 2015. The main features will include encouraging eligible persons who have yet to register as electors (particularly eligible young people) to make registration, reminding electors to fulfil their civic responsibility to notify the REO of any change in their residential addresses and reminding applicants/electors that they should provide accurate and true information for VR. An inter-departmental working group has been set up to coordinate the publicity exercise and the publicity plan is being reviewed and formulated.
13. Separately, to facilitate the public to check whether they are registered as electors and whether their VR particulars are accurate, the REO has launched the Online Voter Information Enquiry System (OVIES) on 1 September 2014. Electors may $\log$ in the system (www.voterinfo.gov.hk) any time to check whether they are registered as electors and their latest registration particulars including registered addresses and constituencies. In order to promote OVIES, from September to December 2014, a leaflet introducing this online system will be mailed to more than 2 million households along with water bills to encourage electors to make use of the new system. OVIES provides an extra, simple and convenient means for electors to check their registration particulars, and submit applications for change of particulars in a timely
manner where necessary, thereby enhancing the accuracy of voter registers. We shall consider further promoting the system when planning the publicity work of the 2015 VR campaign.
14. The REO will continue adopting the checking measures and implementing the inquiry process in the 2015 VR cycle to enhance the accuracy of particulars contained in the voter registers and ensure the integrity of the VR system. The REO will also continue reminding electors to fulfil their civic responsibility to update their registration particulars.

## WAY FORWARD

15. We shall strengthen publicity efforts to encourage the public to register as electors and to update their registration particulars in a timely manner. The Administration will report the details of the 2015 VR campaign to this Panel early next year.
