Dear Sir / Madam,

**Re: Receiving public views on "Expansion of Hong Kong International Airport into a
Three-Runway System and its related impacts on the environment"**

In view of meeting the future air traffic growth, securing Hong Kong as the international aviation hub, and considering the benefit so it brings to the society's economy and employment, we are writing to support the expansion of Hong Kong International Airport into a Three-Runway System.

We understand that the project area might cover part of the prime habitat of Chinese white dolphins, however, we strongly believe that the environmental impact has been studied in scrutiny and the construction impact to the environment will be carefully mitigated by various effort including advanced building technologies, continuous monitoring by environmental protection group, as well as Airport Authority's firm commitment to build the Hong Kong's largest-ever marine park.

To achieve a good balance between economic benefit and environmental protection, we support the expansion by having strong confidence towards Airport Authority in compliance with the requirement in mitigating and compensating for any potential environmental impacts.

Yours truly,
For an on behalf of
