

**For discussion
on 12 April 2016**

Legislative Council Panel on Housing

**Proposed Creation of One Supernumerary Directorate Post in the Civil
Engineering and Development Department
and Two Permanent Directorate Posts in the Housing Department
for Coping with the Additional Workload Arising
from the New Public Housing Supply Target**

PURPOSE

This paper seeks Members' views on the proposed creation of the following directorate posts with effect from the date of approval by Finance Committee (FC) –

- (a) one supernumerary Chief Engineer (CE) (D1) post in the Civil Engineering and Development Department (CEDD) for five years to implement infrastructure projects supporting public housing developments;
- (b) one permanent Chief Housing Manager (CHM) (D1) post in the Housing Department (HD)¹ to cope with the additional workload arising from the growing property portfolio and enhanced measures on property and tenancy management; and
- (c) one permanent Chief Estate Surveyor (CES) (D1) post in HD to cope with the additional workload arising from the resumption of the sale of new Home Ownership Scheme (HOS) flats and sale exercises of other subsidised sale flats of the Hong Kong Housing Authority (HA).

2. We also plan to take the opportunity to rationalise the distribution

¹ HD is the executive arm of HA. HD staff (all being civil servants) are seconded to HA, which also employs its own staff under HA contract terms. Expenditure for salaries and allowances for civil servants working in HA is reimbursed by HA.

of duties and responsibilities of some directorate posts in the Estate Management Division (EMD) of HD.

JUSTIFICATION

Background

3. To plan ahead to meet the housing demand of the community over the long term, the Government promulgated the Long Term Housing Strategy (LTHS) in December 2014. As set out in the LTHS, the Government will update the long term housing demand projection annually and present a rolling ten-year housing supply target for timely adjustment where necessary. According to the LTHS Annual Progress Report announced in December 2015, the public housing supply target for the ten-year period from 2016-17 to 2025-26 will be 280 000 units, including 200 000 public rental housing (PRH) units and 80 000 subsidised sale flat (SSF) units. The challenges and workload implications on different fronts of the Government are considerable in meeting the supply target.

Need for One Supernumerary CE Post in CEDD

4. To meet the challenging target of increasing on-going housing supply, the Government has adopted a multi-pronged strategy to increase land supply. One of the initiatives is to conduct land use reviews on “Government, Institution or Community”, “Green Belt”, “Industrial” and other non-residential zones for identifying potential sites suitable for residential use. With the dedicated efforts in land use reviews in the past years, the Government has identified a considerable number of potential sites suitable for public housing use.

5. For those sites identified for public housing developments, the Government spares no effort to press ahead their implementation for forming the required land to meet the community’s demand for public housing. As most of these potential sites require rezoning of land uses under the Town Planning Ordinance (Cap. 131), it is necessary to establish the viability of the public housing use through comprehensive traffic, environmental, geotechnical and engineering studies for supporting the rezoning. It is also of paramount

importance that the site formation and essential infrastructure including roads, water supply, sewers, drains, etc. be completed on time to support the public housing developments.

6. CEDD possesses the technical capabilities required in the delivery of housing-related infrastructure projects under Capital Works Reserve Fund Head 711 through conducting technical studies and implementing the required site formation and essential infrastructure works. CEDD has taken up 62 such potential sites² since 2012 with strengthened support of professional and supporting staff but without additional resources at directorate level.

7. To make available adequate formed land for public housing developments, CEDD is tasked to undertake technical studies and infrastructure works for 17 new potential sites (the New Sites), with the current schedule to commence the required technical studies in 2016-17 to support the timely rezoning of the New Sites for housing use, and to deliver them to HA for production of public housing units in phases by as early as 2023. The preliminary assessment indicates that most of these sites involve complicated technical constraints and are less readily accessible for development. They demand substantial efforts for the necessary site formation and supporting infrastructure works for the proposed public housing developments. Hence, we need the steer at directorate level at the very start of the studies to ensure that the various constraints are properly addressed in developing the most practicable option for the subsequent site formation and supporting infrastructure works.

8. Furthermore, these potential sites are scattered across the territory, and are mostly at an initial inception stage requiring substantial engagement with the public including District Councils and local organisations/committees with a view to obtaining their support for the development proposals. Such public engagement exercise is crucial to the process of securing approval of the required rezoning as well as the subsequent site formation and infrastructure projects. Dedicated leadership, including the formulation of public engagement and consultation strategy, at directorate level is indispensable in fostering sustained and close communications with these stakeholders to establish a mutually trustworthy partnership for ensuring the timely delivery of such a large number of scattered sites, particularly under an extremely tight

² Including 17 new potential sites mentioned in paragraph 7.

implementation programme.

9. The existing directorate officers in CEDD have no spare capacity to cope with the additional workload arising from the New Sites as the department has already been fully engaged with a large number of on-going and new development projects, including Liantang/Heung Yuen Wai Boundary Crossing Point, Development at Anderson Road, West Kowloon Cultural District Government Infrastructure Project, Kai Tak Development, Wan Chai Development II and the associated works for Central-Wan Chai Bypass, Tseung Kwan O - Lam Tin Tunnel, Cross Bay Link in Tseung Kwan O, Trunk Road T2, Kwu Tung North and Fanling North New Development Areas, development of Lok Ma Chau Loop, Tung Chung New Town Extension, topside commercial development at the Hong Kong boundary crossing facilities island of the Hong Kong-Zhuhai-Macao Bridge, Sunny Bay reclamation, and Siu Ho Wan reclamation and adjoining development. Having regard to the level and scope of responsibilities, we consider that a supernumerary CE post is required to cope with the additional workload arising from the need to steer and manage strategically the timely delivery of the New Sites.

10. This new supernumerary CE post has to be created at the earliest opportunity in 2016-17 as the New Sites are mostly at the inception stage which demand immediate action for their delivery to meet the tight programme. Given that the expected timeframe for the delivery of the New Sites will at least go beyond 2021, the continual need of the proposed supernumerary CE post will be reviewed in the second half of 2020 taking into account the implementation progress of the project.

11. The proposed supernumerary CE post, to be designated as CE/Housing Projects 2 (CE/HP2), will be placed under the Civil Engineering Office (CEO) to head a new division, namely Housing Projects 2 Division. Though there is an existing Housing Projects 1 Unit under CEO, it has no directorate support and its manpower has been fully engaged with on-going projects in hand, hence there is no excess capacity to take up the New Sites.

Annex A shows the proposed organisation chart of CEDD including the proposed division in CEO. The job description of the proposed CE/HP2 post is at **Annex B**.

12. Apart from the proposed supernumerary CE post, CEDD will also enhance the non-directorate staffing in CEO for the implementation of the concerned studies and infrastructure projects supporting public housing developments at these potential sites by creating 19 non-directorate posts on a five-year term with effect from 2016-17. Summaries of the posts and their duties are shown at **Annex C**.

Alternatives Considered

13. CEDD has critically reviewed the existing staff resources situation with due regard to the resources required for those on-going projects, new initiatives and the urgency and importance of the New Sites to increase land supply for public housing developments. The review shows that the directorate officers in CEDD are fully engaged in their daily responsibilities in providing technical services and handling on-going major infrastructure projects including those implemented under the short, medium and long term land supply initiatives. There are no spare staff resources at directorate level for CEDD to undertake the development of the New Sites. The key portfolios of other CE posts in CEDD are at **Annex D**.

Need for One Permanent CHM Post in HD

Functions and Directorate set-up of EMD in HD

14. EMD is responsible for the management and maintenance of PRH estates. The on-going production of PRH units to meet the rolling ten-year public housing supply target will inevitably further stretch EMD's manpower in managing the continuous increase in property portfolio of HA. Currently, EMD is headed by a Senior Assistant Director of Housing (D3), designated as Deputy Director (Estate Management), who is underpinned by three Assistant Directors of Housing (ADH) (D2) designated as Assistant Directors (Estate Management), ten Chief Managers/Management (CMs/M) (multi-disciplinary posts at D1 level) and one Chief Estate Surveyor (CES) (D1) overseeing the central functions of five Support Services (SS) Sections³ and six Management

³ The major responsibilities and central functions of the five SS Sections including SS(1), SS(2), SS(4), SS(5) and Commercial Properties Support Services Section (CPSS) are –

Regions⁴, each with an average of about 136 000 PRH units⁵. The existing organisation chart of EMD is at **Annex E**.

15. The organisation of EMD has remained largely the same since the major re-organisation of EMD in mid-2010 when one ADH and one CES posts were created. Since then, there has been no corresponding increase in directorate posts for coping with the continuous increase in the property portfolio; launching of other new initiatives and policies on property and tenancy management for enhancing the sustainability of public housing provision; and rising aspiration from tenants.

Continued Increase in Property Portfolio

16. EMD manages a wide range of property portfolio, comprising 793 700 PRH units⁶ in 173 estates, 456 200 SSF⁷, 2 583 600 m² non-domestic properties and 28 600 car parking spaces. With the increase in the production of new PRH units to meet housing demand, there will be a net increase of 81 900 PRH units representing a 12% increase since 2010 when there were a total of 711 800 PRH units and an average of 127 800 PRH units in each

-
- SS(1) : Contract administration and headquarters support to building services works, overseeing civil engineering improvement programme, provision of quantity surveying services to EMD and HOS/Private Sector Participation Scheme (PSPS) agency services;
 - SS(2) : Formulation of tenancy management policy, rent matters, operation of Estate Management and Maintenance System and rational use of public housing resources;
 - SS(4) : Land administration matters of PRH estates, HOS and PSPS courts, and valuation for premium payment and refinancing applications;
 - SS(5) : Revitalisation of older estates and structural engineering matters; and
 - CPSS : Formulation of strategy and reviewing of policies in the letting and management of non-divested commercial and non-domestic properties.

The former CM/M overseeing SS(3) had been redeployed as the CM/M of a new Management Region created in 2010 and the functions of the former SS(3) were taken by the new Management Region and other SS Sections as mentioned in EC(2010-11)7.

⁴ The six Management Regions include Kowloon East (KE) Region; Kowloon West & Hong Kong (KWH) Region; Tai Po, North, Shatin & Sai Kung (TNS) Region; Tuen Mun & Yuen Long (T&Y) Region; Kwai Chung (KC) Region and Wong Tai Sin, Tsing Yi, Tsuen Wan & Islands (WTI) Region.

⁵ Except KC Region, with a property portfolio of about 76 000 PRH units, which also takes charge of the Total Maintenance Scheme Unit; contract management of building works contracts; implementation of site safety initiatives; and coordination of research and development projects for improving the cost effectiveness of maintenance works.

⁶ Including 37 700 PRH units to be completed by March 2017.

⁷ Including flats sold under the Tenants Purchase Scheme (TPS).

Management Region⁸. This has resulted in a corresponding increase in the workload for the Management Regions. In particular, the PRH stock of KWH, KE and TNS Regions will increase to 153 500, 148 800 and 145 100 respectively by March 2017 (representing an increase of around 14% to 20% in the average PRH units since 2010). To cope with the additional workload arising from the growing property portfolio, there is an imminent need to strengthen the directorate support in housing management to head a new Management Region and to rationalise the duties and responsibilities of the existing CM/Ms.

Pressing Need to Strengthen Tenancy Management and Curbing Housing Abuse to Meet Community Expectation

17. Apart from the increase in public housing provision, the allocation and utilisation of PRH units is another key area of concern which requires EMD's heavy involvement. Such work includes combating the abuse of PRH units. There were also recommendations from the studies conducted by the Audit Commission, Office of the Ombudsman and Independent Commission Against Corruption between 2013 to 2015 that HD should tighten its tenancy management. To this end, EMD's frontline staff need to step up such as inspection and checking of non-occupancy and sub-letting. Such work needs supervision and steer at directorate level.

New Challenges in Property Management

18. With rising aspirations for better living standards and a green and healthy environment in PRH estates, the scope of property management services has been expanding over the years. For example, we have implemented a number of initiatives including the ISO 50001 energy management system, ISO 14001 environmental management system, OHSAS 18001 occupational health and safety management system, sustainable building index, major maintenance and improvement programmes such as Mandatory Window Inspection Scheme, Mandatory Building Inspection Scheme and enhancement programmes for laundry pole holders and collapsible gates. We need the steer and supervision of a directorate officer with property management background to coordinate and oversee these programmes to ensure their effective implementation.

⁸ Except KC Region with the then property portfolio of about 73 000 PRH units.

Alternatives Considered

19. We have examined whether the additional workload can be absorbed through internal redistribution of work, redeployment of resources or re-engineering of work process. Having regard to the reasons as set out above, we consider it not feasible for the existing CMs/M and CES in EMD to take up the additional duties without affecting the discharge of their own duties. The ten CMs/M⁹ and one CES in EMD have already been fully tied up with their respective directorate supervision and management functions as summarised at **Annex F**.

Proposed New Structure and Staffing Implications

20. In view of the expanding property portfolio and the new challenges mentioned above, we propose to create one CHM post in EMD with detailed job descriptions at **Annex G**. With the creation of the CHM post, the existing six Management Regions will be re-organised into seven. The major changes involve the re-alignment of the management boundaries of the existing Regions viz. KC, KE, KWH, TNS, T&Y and WTI to form seven new Regions viz. KC¹⁰; KE; Kowloon West & Sai Kung (KWS); Tai Po, North & Shatin; T&Y; Wong Tai Sin, Tsing Yi & Tsuen Wan (WTT); Hong Kong Island & Islands¹¹ (HKI). The changes in duties/structure of all directorate posts in EMD are at **Annex H**. The proposed organisation chart of EMD is at **Annex I**.

21. The proposed set-up will result in a more even distribution of workload at directorate level and improve the policy steer on estate management work, notably in strengthening tenancy management and curbing housing abuse, and meeting new challenges in property management.

⁹: Including one CES occupying a multi-disciplinary post of CM/M.

¹⁰: The CM/M of this Region will undertake project management works (as set out in Note 5) in addition to regional management.

¹¹: The CM/M of this Region will undertake management control in addition to regional management.

Need for One Permanent CES Post in HD

22. The LTHS promulgated in December 2014 reaffirms that subsidised home ownership is an essential element of the housing ladder and is a core component of the LTHS. Specifically, for some low to middle-income families, HOS flats and other forms of SSF serve as their first step for home ownership. SSF also provide an avenue for better-off PRH tenants to buy their own homes, thereby releasing their PRH units for applicants for PRH. Sale of HOS and other forms of SSF has now become a recurrent activity of HA. The majority of the 80 000 SSF under the public housing supply target as announced in the LTHS Annual Progress Report 2015 will be constructed and sold by HA.

23. Before HOS units are sold to buyers, there is an application process. For the HOS sale exercise in 2016, HA and the Hong Kong Housing Society (HKHS) have arranged a joint application exercise so as to enable applicants to apply for HA's HOS flats and HKHS's SSF by completing one application form and undergoing one vetting process. As a result, HD staff took up all the work for the joint application exercise.

24. In addition to the sale of HOS flats, HA has also put in place a number of new initiatives and pilot projects with a view to expanding the form of SSF and facilitating circulation. Such new initiatives include the Interim Scheme to Extend the HOS Secondary Market to White Form Buyers (Interim Scheme) launched in January 2013 which allows 5 000 eligible White Form buyers to purchase flats in the HOS Secondary Market with premium not yet paid. A new round of the Interim Scheme with a quota of 2 500 was launched in 2015, thereafter a review on the future of the Interim Scheme will be conducted. Furthermore, HA will also launch the pre-sale of the Green Form Subsidised Home Ownership Pilot Scheme (GSH) in the second half of 2016, with about 860 SSF for sale to Green Form applicants.

25. The preparatory work required for the sale of HOS and other SSF is diversified and involves professional knowledge in estate surveying and land administration related matters. The sale preparation work includes formulating sale programme; conducting valuation for the purpose of determining sale prices; formulating application arrangements such as eligibility, balloting, allocation of quota, flat selection priority, etc.; devising

sales documents such as sales booklets, sales brochures, price lists, application forms and application guides; preparing publicity materials and arrangements such as models, exhibitions, websites, advertisements; devising mortgage arrangements and preparing Deed of Guarantee; devising conveyancing arrangements and preparing agreements for sale and purchase and assignments; and execution of assignments. During the sale stage, there is also a need to process the applications; vet applicants' eligibility and devise appropriate arrangements for flat selection, etc. To enable early launch of each sale exercise, we impose tight deadlines on each stage of the preparatory work. Besides, since information contained in the relevant sales documents have to comply with statutory requirements, we also need to pay extra attention in the process.

Functions and Directorate set-up of Housing Subsidies Sub-division of the Strategy Division in HD

26. At present, Housing Subsidies Sub-division (HSSD) of the Strategy Division in HD is responsible for coordinating all the preparatory work and conducting the actual sale exercises of all HOS and SSF of HA.

27. HSSD comprises two sections, namely, the Land Administration Section (LAS) and the Allocation Section. HSSD is headed by an ADH (D2), designated as Assistant Director (Housing Subsidies) (AD(HS)), who oversees work relating to the sale of HOS and other forms of SSF; allocation of PRH units; and HA's clearance programmes. In respect of the Allocation Section, AD(HS) is underpinned by a CHM (D1) who provides support in handling PRH allocation and clearance programmes. As for the LAS, there are a total of six teams, four of which are responsible for work relating to the sale of SSF as described in paragraph 25 above. Among the four teams, one team is responsible for the sales operation during the sale stage and the other three teams share the workload for the sale preparation of all HOS and SSF developments. The remaining two teams are responsible for post-sale matters of HOS/PSPS/TPS flats (such as change of ownership and mortgage, mortgage default claims, etc.); as well as the administration of the HOS Secondary Market Scheme which includes processing of applications, preparing mortgage arrangements and Deed of Guarantee. The six teams in LAS are each headed by a senior professional¹² (non-directorate level) who

¹²: The six senior professionals include five Senior Estate Surveyors and one Senior Housing Manager.

reports direct to AD(HS). The existing organisation chart of HSSD is at **Annex J**.

28. Despite the resumption of HOS and the introduction of various new initiatives relating to SSF and the consequential increase in workload, there is no directorate support for AD(HS) in the LAS. As a result, AD(HS) has to directly supervise the six teams in the LAS. With the incremental roll-out of HOS production as well as other SSF in the coming years, it is expected that the number of flats to be put up for sale will increase. Given the workload involved in each sale exercise and the need to attend to all the details regarding the preparatory work and the sale arrangements, without the input of a directorate officer who has the necessary professional expertise and experience, AD(HS) is experiencing increasing difficulty in effectively supervising the work involved in a timely manner. The situation will deteriorate with the increase in the number of sale exercises due to the various new initiatives. There is thus an imminent need to strengthen the directorate support in HSSD by creating one CES post on a permanent basis to cope with the significant increase in workload arising from the sale of SSF.

29. With the creation of the proposed CES post, to be designated as CES(Housing Subsidies) (CES(HS)), the post holder will provide professional support to AD(HS) in overseeing the work of the LAS. CES(HS) will be responsible for formulating and coordinating sale programmes and sale arrangements for the implementation of all SSF of HA and related new initiatives; devising and monitoring work programme for sale preparation work; supervising valuation work for pricing of individual SSF, and approving the pricing under delegated authority; overseeing the preparation of sales brochures, price lists, and other relevant sales documents; overseeing the implementation of sale arrangements and conveyancing arrangements; supervising the on-going sale of TPS flats and post-sale land administration matters of TPS estates; and supervising post-sale services relating to HOS/GSH/TPS (e.g. mortgage default claims). The job description of the proposed CES(HS) post is at **Annex K**. The proposed organisation chart of HSSD is at **Annex L**.

Alternatives Considered

30. At present, there are two CES¹³ in HD and both are under EMD. One of them is responsible for matters relating to estate boundaries, delineation of management and maintenance responsibilities, conditions under government leases, Deeds of Mutual Covenant and related documents for public housing estates and HOS projects, as well as refinancing valuation and premium assessment for the existing stock of HOS/TPS/PSPS flats. The other CES is responsible for the management, valuation, improvement and letting matters of commercial and non-domestic properties of HA. The two CES have their specific functions and are fully occupied with their existing duties. Redeployment of these CES to take up the duties of the proposed CES(HS) post is considered not viable. We have also critically examined whether the additional workload can be absorbed through internal redeployment within HSSD or re-engineering of work processes. However, having regard to the fact that there is only one D1 post in HSSD, which is of a different professional discipline and has its specific full schedule, it is infeasible for the post holder to take up the duties of the proposed CES(HS) post.

31. The proposed organisation chart of HD after the creation of the two directorate posts is at **Annex M**.

FINANCIAL IMPLICATIONS

32. The proposed creation of a supernumerary CE post in CEDD and two permanent posts of a CHM and a CES in HD will bring about an additional notional annual salary cost at mid-point of \$4,989,600. The additional full annual average staff cost, including salaries and staff on-cost, will be \$7,015,848. A breakdown is shown in the table below –

¹³ : One of the CES is occupying a multi-disciplinary post of CM/M(SS4) and another occupying a CES post responsible for overseeing CPSS.

Rank	No. of post	Notional annual salary cost at mid-point (\$)	Full annual average staff cost (\$)
CE	1	1,663,200	2,395,164
CHM	1	1,663,200	2,137,056
CES	1	1,663,200	2,483,628
<u>Total</u>	<u>3</u>	<u>4,989,600</u>	<u>7,015,848</u>

33. There are 19 non-directorate civil service posts¹⁴ created in CEDD to meet the new workload demand. The additional notional annual salary cost at mid-point and the full annual average staff cost including salaries and staff on-cost are respectively about \$14,849,700 and \$24,298,000. CEDD has included the necessary provision in its 2016-17 draft Estimates to meet the cost of the proposal and will reflect the resources required in the Estimates of subsequent years. The full cost for the two directorate posts in HD will be recovered from HA under the established arrangement for HD staff seconded to HA.

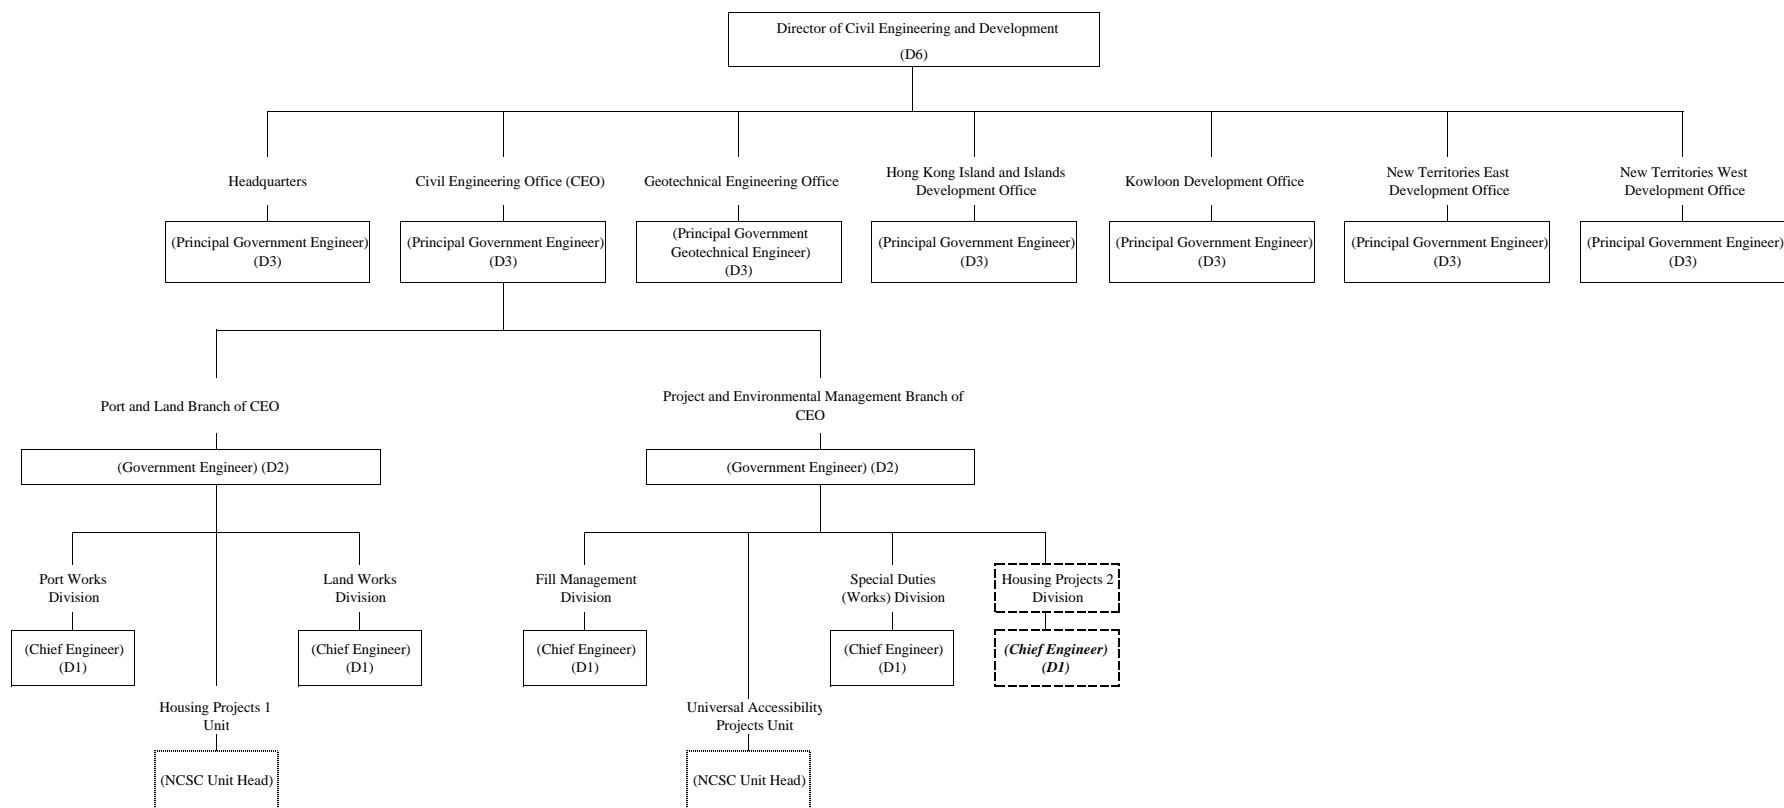

ADVICE SOUGHT

34. Members are invited to comment on the proposals. Subject to Members' support, we will submit the proposals to the Establishment Subcommittee of FC.

Transport and Housing Bureau April 2016

¹⁴: The 19 non-directorate civil service posts are created on a five-year term and the need for their retention is subject to review in the second half of 2020.

Proposed Organisation Chart of Civil Engineering and Development Department

Legend:

- New division to be formed and headed by the proposed supernumerary Chief Engineer post for new housing development projects.
- Units which are headed by non-civil service contract (NCSC) staff under the direct supervision of D2 officers.

Proposed Job Description
Chief Engineer/Housing Projects 2

Rank : Chief Engineer (D1)
Responsible to : Government Engineer (D2), Project and
Environmental Management Branch/Deputy Head
of Civil Engineering Office

Major Duties and Responsibilities -

1. To lead and supervise a works division assigned under him/her.
2. To execute the strategies and policies formulated by the policy bureaux in respect of the public housing development projects.
3. To oversee the administration, feasibility and engineering study, planning, design and construction supervision (including assuming the role of Project Manager under New Engineering Contract form contracts) for the proposed housing development sites.
4. To implement effective control (including quality and budgetary control) for the projects undertaken by the Division.
5. To oversee the implementation of statutory and administrative procedures including Environmental Impact Assessment Ordinance procedures, public consultation, gazettals under the relevant Ordinances, funds seeking, commissioning of consultancies, tendering of works contracts and contract administration.
6. To drive for timely achievement of milestone targets, co-ordinate and oversee timely resolution of interfacing matters with other projects and developments.
7. To plan and conduct public engagement/consultation with a view to soliciting public support to project implementation, including District Councils, rural committees, etc.
8. To supervise the selection and appointment of consultants and contractors.
9. To manage consultants engaged in the projects including overseeing progress of studies and works, provision of guidance to consultants, assessment and reporting of consultants' recommendations and resolution of important issues.

**Details of Non-Directorate Posts Created in the
Civil Engineering and Development Department for
Infrastructure Projects Supporting Public Housing Developments**

Grades	Major duties and responsibilities
<ul style="list-style-type: none"> • Engineer 	<ul style="list-style-type: none"> • To carry out engineering duties such as – <ul style="list-style-type: none"> - implementing statutory and administrative procedures including the Environmental Impact Assessment Ordinance procedures, gazettals under the relevant Ordinances, public consultation, seeking of funding, financial control and forecast, commissioning of consultancies and tendering of works contracts; - contract administration and consultant management
<ul style="list-style-type: none"> • Technical Officer 	<ul style="list-style-type: none"> • To provide technical support in preparation of plans, drawings, display and presentation materials
<ul style="list-style-type: none"> • Clerical Officer 	<ul style="list-style-type: none"> • To provide clerical support with regard to the distribution and filing of incoming and outgoing correspondences, checking of invoices and payment certificates and handling of personnel, office accommodation and supplies matters

Key portfolios of the other existing Chief Engineer posts in the Civil Engineering and Development Department (CEDD)

All the other existing Chief Engineer (CE) posts in CEDD^{Note 1} are fully engaged in their respective duties. It is operationally not possible for them to take up the additional tasks without adversely affecting the discharge of their current duties.

Civil Engineering Office

2. **Chief Engineer/Special Duties (Works)** is responsible for the planning, design and construction of the Anderson Road Development, Decontamination Works at Kennedy Town Comprehensive Development Area, and site formation and infrastructure works for public housing sites at Long Bin, Tan Kwai Tsuen and Ma On Shan; provision of technical support to Steering Committee on Implementation of Hong Kong Disneyland and Ocean Park Redevelopment Committee on further expansion of the theme parks; and co-ordination of maintenance issues in Penny's Bay Development Area.

3. **Chief Engineer/Port Works** is responsible for overseeing the study on increasing land supply by reclamations outside Victoria Harbour and rock cavern development; the strategic studies for artificial islands in the central waters, and planning and engineering studies for the near-shore reclamations in Sunny Bay and the seafront of Sai Kung Sewage Treatment Works; the technical studies for Siu Ho Wan Reclamation, Lung Kwu Tan Reclamation, Ma Liu Shui Reclamation and Climate Change; the implementation of marine infrastructure projects including improvement of Sai Kung public pier, Improvement Works to Tap Mun Pier, Reconstruction of Sharp Pier, public landing steps at Lei Yue Mun Waterfront, Yung Shue

^{Note 1} Following the announcement of the 2016 Policy Address, CEDD proposes to set up a new Lantau Development Office (LDO) as soon as possible together with a proposal to re-organise CEDD by redistributing the duties and responsibilities among the other existing Development Offices. While the LDO proposal is yet to be approved by LegCo, for clarity, the portfolios of all existing CEs as shown in this document are under the current CEDD set up.

Wan Development Phase 2, and sediment removal at five Fish Culture Zones and bathing beach at Lung Mei; and maintenance of public marine facilities including piers, ferry terminals, Kai Tak Cruise Terminal, Cross Harbor Tunnels, seawalls, breakwaters, typhoon shelters and fairways.

4. **Chief Engineer/Land Works** is responsible for the planning, design and construction of the site formation and infrastructure works for public housing developments in Tuen Mun Area 54 and Tuen Mun North; the site formation for development and implementation of the Food and Health Bureau's columbarium and crematorium facilities in Sandy Ridge and Wo Hop Shek; the footbridge widening and bus layby extension in the vicinity of Mass Transit Railway Fanling Station; and the New Territories (NT) Greening Master Plans covering nine NT Districts and the Islands District. He also oversees the administration and management of CEDD Landscape Term Contract.

5. **Chief Engineer/Fill Management** is responsible for the strategic planning and management of construction and demolition materials, marine disposal for contaminated and uncontaminated sediments; design and operation of public fill reception facilities including two barging points and two fill banks, mud pits for contaminated sediments and construction waste sorting facilities; and liaison with the State Oceanic Administration for the cross-boundary disposal of inert construction and demolition materials and dredged sediments. He is also responsible for the overall management of the Dredging Works at Kwai Chung Container Basin and its Approaching Channel; and controlling the issuance of sand permits to meet the requirements of Ministry of Commerce and the Development Bureau and providing secretarial support to the Public Fill and Marine Fill Committees.

Hong Kong Island and Islands Development Office

6. **Chief Engineer/Hong Kong 1** heads the Hong Kong 1 Division and is responsible for the overall administration, planning, design and construction supervision of works packages, with major focus on the Central Reclamation Phase III, Wan Chai Development Phase II (WDII) Contract C3,

construction of additional floors at Central Piers 4-6, reassembly of Queen's Pier, housing sites at Braemar Hill, boardwalk under the Island Eastern Corridor and the district administration matters for Central & Western and Eastern Districts. He will also take up the new initiatives of the topside development at the Hong Kong-Zhuhai-Macao Bridge Hong Kong cross boundary facilities island and matters related to the East Lantau Metropolis.

7. **Chief Engineer/Hong Kong 2** heads the Hong Kong 2 Division and is responsible for the overall administration, planning, design and construction supervision of works packages, with major focus on WDII Contracts C1, C2 & C4 and the site formation at Ka Wai Man Road Phase 2. He is also responsible for overseeing interfacing issues among WDII, Central-Wan Chai Bypass and the Shatin to Central Link and the district administration matters of the Wan Chai and Southern Districts.

8. **Chief Engineer/Islands** heads the Islands Division and is responsible for the overall administration, planning, design and construction supervision of works packages, with major focus on improvement works at Tai O, Tung Chung New Town Extension, site formation works at Tung Chung Areas 53/54, infrastructure works at Tung Chung Area 56, future land use at the ex-Lamma quarry site, Mui Wo facelift project, village sewerage at Cheung Chau and the district administration matters for the Islands District. He is also responsible for the co-ordination role in respect of the Lantau Development Advisory Committee.

Kowloon Development Office

9. **Chief Engineer/Kowloon 1** is responsible for the overall administration, planning, design and construction supervision of works packages at Kai Tak Development (KTD), with major focus on the planning and design of infrastructure at ex-runway and adjoining apron areas, design ideas competitions, studies on public creativity and review of development parameters at KTD, in addition to co-ordination of major interfacing projects covering Central Kowloon Route, Multi-purpose Sports Complex, schools, government buildings and open space in KTD. He is also responsible for

the district administration matters of the Wong Tai Sin and Kwun Tong Districts.

10. **Chief Engineer/Kowloon 2** is responsible for the overall administration, planning, design and construction supervision of works packages, with major focus on the design of Trunk Road T2 at KTD, the implementation of government infrastructure and facilities for West Kowloon Cultural District development, Kwun Tong Town Centre redevelopment and ex-Cha Kwo Ling Kaolin Mine Site development, in addition to the planning and design of three footbridges at Sham Mong Road. He is also responsible for the district administration matters of the Sham Shui Po and Yau Tsim Mong Districts.

11. **Chief Engineer/Kowloon 3** is responsible for the overall administration, planning, design and construction supervision of works packages at KTD, with major focus on the planning and design of infrastructure at north apron area, improvement works for Kai Tak Approach Channel, structural deck at the ex-runway, cycle track network, in addition to the reconstruction and upgrading of Kai Tak Nullah, studies on Environmentally Friendly Linkage System, interfaces with Shatin to Central Link, and co-ordination of land use and drainage works. He is also responsible for the district administration matters of the Kowloon City District.

12. **Chief Engineer/Kowloon 4** is responsible for the overall administration, planning, design and construction supervision of works packages, with major focus on the construction of infrastructure at the former north apron and runway areas at KTD as well as for two housing sites at Tai Wo Ping, bioremediation works at Kai Tak Approach Channel and Kwun Tong Typhoon Shelter, site formation and dredging works for cruise terminal development, and co-ordination of works for District Cooling System.

13. **Chief Engineer/Kowloon 5** is responsible for the overall administration, planning, design and construction supervision of works

packages of the integrated basement and government structure works for the West Kowloon Cultural District. He is also responsible for liaising with the West Kowloon Cultural District Authority, the Mass Transit Railway Cooperation Limited and associated bureaux/departments for achieving timely delivery of the project.

New Territories West Development Office

14. **Chief Engineer/New Territories West 1** is responsible for the overall administration, planning and supervision of the planning and engineering study for the potential development/housing sites at Yuen Long South as well as the overall administration, planning, design and construction supervision of the site formation and infrastructure projects at Yuen Long and the Lok Ma Chau Loop development. He is also responsible for the district administration matters of the Yuen Long District.

15. **Chief Engineer/New Territories West 2** is responsible for the overall administration, planning and supervision of the planning and engineering studies for the potential development/housing sites at Tuen Mun Areas 40 and 46 and the adjoining areas, and Lam Tei Quarry Site and the adjoining areas as well as the overall administration, planning, design and construction supervision of the Widening of Tsuen Wan Road between Tsuen Tsing Interchange and Kwai Tsing Interchange Project, and the Investigation Study for the Flyover from Kwai Tsing Interchange Upramp to Kwai Chung Road. He is also responsible for the district administration matters of the Tuen Mun, Tsuen Wan and Kwai Tsing Districts.

16. **Chief Engineer/New Territories West 3** is responsible for the overall administration, planning and supervision of the planning and engineering study for the Hung Shui Kiu New Development Area, as well as the overall administration, planning, design and construction supervision of the Widening of Tin Ha Road and Tan Kwai Tsuen Road Project and the New Territories Cycle Track Network Project. He is also responsible for the district administration matters of the Hung Shui Kiu area.

17. **Chief Engineer/New Territories West 4** is responsible for the overall administration, planning, design and construction supervision of the Advance Site Formation and Engineering Infrastructure Projects of Hung Shui Kiu New Development Area and the Site Formation and Infrastructure Projects of Initial Housing Sites at Kam Tin South, as well as the overall administration, planning and supervision of the Engineering Feasibility Study for the remaining housing sites at Kam Tin South and studies for housing sites in New Territories West identified through the land use reviews.

New Territories East Development Office

18. **Chief Engineer/New Territories East 1** is responsible for the overall administration, planning, design and construction supervision of works packages, with major focus on the infrastructure works for the Sai Kung area and Tseung Kwan O (TKO) New Town, including the TKO-Lam Tin Tunnel, Cross Bay Link, infrastructure works in TKO Town Centre South, Sai Kung Town improvement works. He is also responsible for the district administration matters of the Sai Kung District.

19. **Chief Engineer/New Territories East 2** is responsible for the overall administration, planning, design and construction supervision of works packages, with major focus on the infrastructure works for the Shatin and Ma On Shan, and development of the Anderson Road Quarry. He is also responsible for the district administration matters of the Shatin District.

20. **Chief Engineer/New Territories East 3** is responsible for the overall administration of the feasibility and engineering studies for developing New Territories North, as well as the planning of the provision of strategic infrastructure works. In addition, he is responsible for the overall administration, planning, design and construction supervision of the site formation and infrastructure projects for the development at Kwu Tung South and Kong Nga Po. He is also responsible for the district administration matters for the North District.

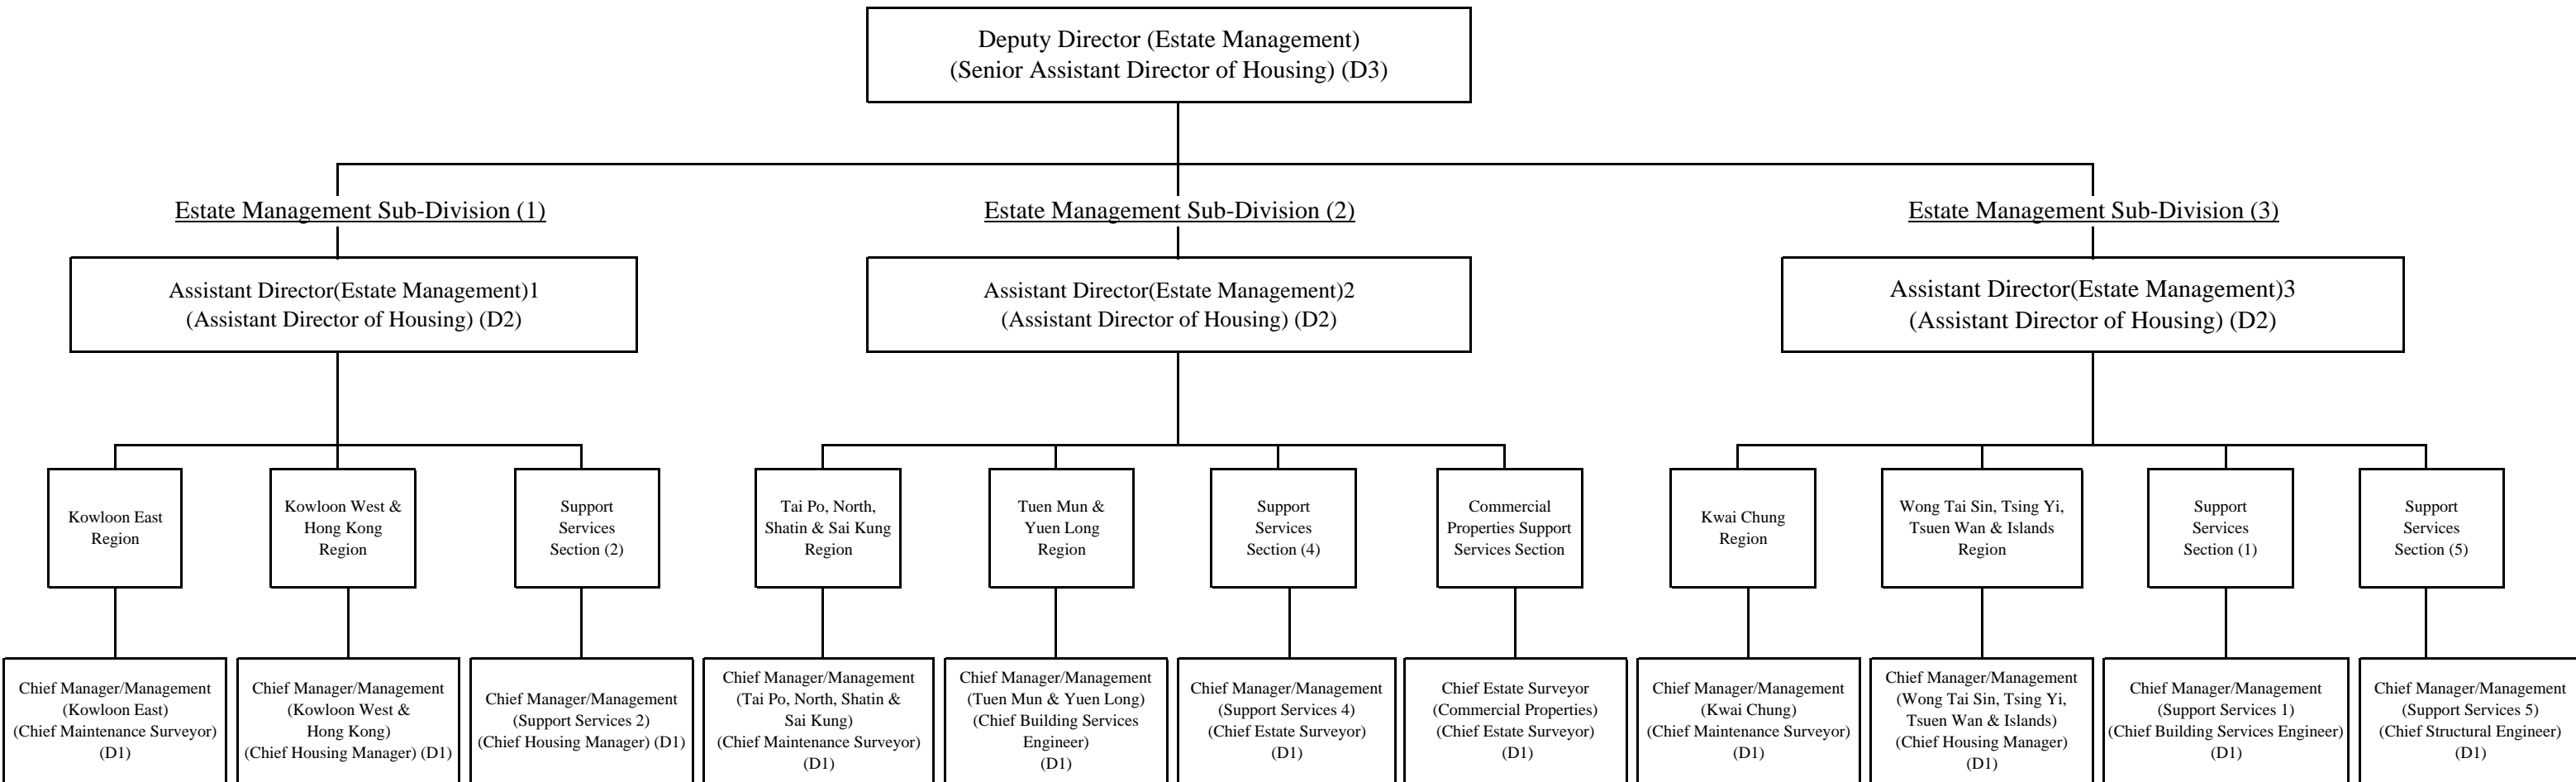

21. **Chief Engineer/New Territories East 4** is responsible for the overall administration, feasibility and engineering studies, planning, design and construction supervision of works packages of the proposed New Development Areas at Kwu Tung North and Fanling North in North East New Territories, as well as the development projects in Tai Po District. He is also responsible for the district administration matters for the Tai Po District.

22. **Chief Engineer/Boundary Control Point** is responsible for the overall administration, planning, design and construction supervision of the Liantang/Heung Yuen Wai Boundary Control Point and associated works projects, including the connecting roads, road tunnels, site formation for the boundary control point and other associated works.

CEDD Headquarters

23. **Chief Engineer/Headquarters** is responsible for the overall administration and management of the Planning Unit, Town Planning Unit, and Engineering and Associated Consultants Selection Board Unit. - (2) The names of the following management regions have been changed following the re-alignment of management boundaries and re-distribution of property portfolio :
- Kowloon West & Hong Kong Region : renamed from Kowloon West & Kowloon City Region
 - Wong Tai Sin, Tsing Yi, Tsuen Wan & Islands Region : renamed from Hong Kong, Tsuen Wan, Tsing Yi & Islands Region

**Duties and Responsibilities of the Existing Regional Chief Managers,
Chief Managers/Management (Support Services) and
Chief Estate Surveyor (Commercial Properties) in
Estate Management Division**

REGIONAL CHIEF MANAGERS

Chief Manager/Management (CM/M)(Kowloon East) looks after the overall management and maintenance of 135 900* public rental housing (PRH) units in 29 estates within the Kowloon East Management Region with 716 posts under its establishment. As most of the estates under his purview are situated in Kwun Tong District, he is required to represent Housing Department (HD) to attend the meetings of Kwun Tong District Council (DC) to deal with matters regarding the policies and day-to-day management of the estates under his purview. Apart from looking after the public housing stock, he takes up additional workload, viz. (i) coordinating technical research and development exercise; (ii) issuing technical Estate Management Division (EMD) Instructions; and (iii) coordinating EMD technical support for the sale of Home Ownership Scheme (HOS) flats.

2. **CM/M(Kwai Chung)** looks after the overall management and maintenance of 76 300* PRH units in 14 estates within the Kwai Chung Region with 487 posts under its establishment. As the estates under his purview are situated in Kwai Chung District, he is required to represent HD to attend the meetings of Kwai Tsing DC. He is also responsible for (i) monitoring the implementation of various site safety initiatives; (ii) coordinating research and development projects for improving the cost effectiveness of maintenance works; (iii) contract management of building works contracts; and (iv) implementation of the Total Maintenance Scheme.

3. **CM/M(Kowloon West & Hong Kong)** looks after the overall management and maintenance of 149 700* PRH units in 41 estates within the Kowloon West & Hong Kong Management Region with 893 posts under its establishment. As the estates under his purview are situated throughout Hong Kong Island and Kowloon West, he is required to represent HD to attend the meetings of seven DCs, viz. Eastern, Wan Chai, Central &

* Excluding new PRH units to be completed by March 2017.

Western, Southern, Sham Shui Po, Kowloon City and Yau Tsim Mong.

4. **CM/M(Tai Po, North, Shatin & Sai Kung (TNS))** looks after the overall management and maintenance of 135 000* PRH units in 30 estates within the TNS Management Region with 685 posts under its establishment. As the estates under his purview are situated in Northern District, Sai Kung, Shatin and Tai Po, he is required to represent HD to attend the meetings of four DCs, viz. North, Tai Po, Shatin and Sai Kung. CM/M(TNS) also takes care of the grade management issues for works professionals, oversees the strategy development related work, and coordinates the administration of Property Service Agents and Enterprise Resource Planning system.

5. **CM/M(Tuen Mun & Yuen Long(T&Y))** looks after the overall management and maintenance of 127 200* PRH units in 24 estates within the T&Y Management Region with 692 posts under its establishment. As the estates under his purview are situated in Tuen Mun and Yuen Long Districts, he is required to represent HD to attend the meetings of two DCs, viz. Tuen Mun and Yuen Long. CM/M(T&Y) also undertakes the formulation of outsourcing strategy, procurement of property services contracts for outsourcing estates (accounting for 60% of the entire PRH portfolio) and supervision of contract implementation and Property Services Agents' performances. He is also responsible for monitoring the public liability insurance claims of EMD and matters relating to Estate Fire Safety Campaign.

6. **CM/M(Wong Tai Sin, Tsing Yi, Tsuen Wan & Islands(WTI))** looks after the overall management and maintenance of 131 900* PRH units in 35 estates within the WTI Management Region with 633 posts under its establishment. As the estates under his purview are situated in Wong Tai Sin, Tsing Yi, Tsuen Wan and outlying Islands, he is required to represent HD to attend the meetings of three DCs, viz. Wong Tai Sin, Tsuen Wan and Islands. CM/M(WTI) also provides policy input on security, cleansing and horticultural services in existing PRH estates and users' feedbacks on new housing developments. In addition, he oversees new initiatives such as the enhanced management of some 104 000 trees in PRH estates.

* Excluding new PRH units to be completed by March 2017.

7. Apart from the day-to-day management duties, all six Regional Chief Managers are heavily engaged with the workload arising from the growth of property portfolio, launching of new housing policies and initiatives in enhancing the sustainability of public housing provision and rising aspirations from tenants.

**CHIEF MANAGERS/MANAGEMENT (SUPPORT SERVICES)
(CMs/M(SS))**

8. **CM/M(SS1)** looks after all matters relating to Building Services (BS) in EMD. He is responsible for the technical standards and maintenance of all BS installations (Lift & Escalators, Electrical, Fire Services, Air-conditioning, Water Supply, Automatic Refuse Collection System and Security System) in the Hong Kong Housing Authority(HA)'s properties, including drawing up maintenance strategy and standards, procurement of maintenance contracts, establishing improvement programmes, etc. and also other duties including overseeing civil engineering improvement programme, provision of quantity surveying service to EMD, and HOS/Private Sector Participation Scheme agency services.

9. **CM/M(SS2)** is responsible for formulating and implementing public housing management policies, handling strategic matters relating to rent, providing management and policy inputs on 153 Estate Management Advisory Committees, Tenants Purchase Scheme (TPS) and measures to safeguard the use of public housing resources, and handling matters relating to the implementation of Housing Subsidy Policy. In addition, he oversees the implementation of new management mode, viz. the New Model of Estate Caretaking Services, etc.

10. **CM/M(SS4)** is responsible for inputs on land issues and supervising the application and processing of vesting orders of land for PRH developments and amendments to boundaries of vesting order plans for completed estates. He also monitors the procurement of Government Lease and Deed of Mutual Covenant for Sale of Subsidised Flats Schemes including HOS and the Green Form Subsidised Home Ownership Pilot Scheme. In addition, he also supervises the valuation for premium payment and refinancing purposes for HOS and TPS flats.

11. **CM/M(SS5)** oversees the implementation of the Comprehensive Structural Investigation Programme (CSIP) for aged public housing estates (currently covering four estates annually), and also the development and implementation of the necessary repair solutions. The Chief manager coordinates the Estate Improvement Programmes for the estates already covered under the CSIP, and the programme for addition of lifts in estate external areas and to low-rise domestic buildings without lift services in some 30 estates. He is responsible for the efficient provision of structural engineering services for EMD as well as ensuring structural safety of all properties maintained by HA. His Section also develops technical standards and practices and carries out special investigations and studies.

12. **Chief Estate Surveyor (Commercial Properties)** is responsible for the formulation of strategy and review of policies for non-domestic properties and overseeing the implementation of the Programmes of Activities endorsed by the Commercial Properties Committee of HA on the letting, management and valuation of all non-domestic properties with a lettable area of 2 583 600 m² and 28 600 car parking spaces. He also provides professional advice to maximise the potential and value of HA's existing and new commercial properties and to look for better operational efficiency in their management.

Proposed Job Description
Chief Manager/Management (Hong Kong Island/Islands & Management Control)

Rank : Chief Housing Manager (D1)

Responsible to : Assistant Director (Estate Management)1

Major Duties and Responsibilities –

1. To assist Assistant Director (Estate Management)1 in formulating policies and strategies, service standards and action plans relating to property management of the Hong Kong Housing Authority (HA)'s properties, including issues relating to environment, safety, health, hygiene and prevention of epidemic diseases;
2. To oversee the management, maintenance and control of properties within the region including monitoring the performance of Property Services Agents;
3. To prepare budgets and forecasts of expenditure, and monitor its utilisation in accordance with the targets set out in the business plans and estate action plans;
4. To co-ordinate users' feedbacks and advise on the design and layout of new public housing estates, take over new stock and ensure prompt letting of all domestic and non-domestic properties;
5. To make political assessment on community reaction through monitoring the progress of redevelopment, major maintenance and improvement programmes, policy changes and interest group activities;
6. To oversee the implementation of estate action plans and operation procedures, monitor their effectiveness and provide feedback to senior management;
7. To co-ordinate the development, implementation and monitoring of maintenance and improvement programmes in public housing estates within the region;

8. To administer services and maintenance contracts and act as the named Contract Manager;
9. To represent HA/Housing Department in meetings with District Councils, District Management Committees, interest groups and political parties;
10. To formulate and review policies and strategies relating to security and cleansing services, management of service contractors and provision of horticultural services to all estates; and
11. To formulate and oversee procedures and guidelines on matters relating to the taking over of new properties.
