Subject: Views on transportation arrangement for Hong Kong-Zhuhai-Macao Bridge

Dear Sir / Madam,

We fully support the idea of utilizing the existing road infrastructure to provide different modes of transportation service to Hong Kong Boundary Crossing Facilities (HKBCF).

Meanwhile, to facilitate the transportation arrangement of airport staff, it is envisaged that the public bus service should pass by and drop off passengers first at HK International Airport Terminals before going to HKBCF.

Furthermore, the frequency of bus services would need to be increased during rush hours to avoid peak hours congestion.

Thank you for your attention !

Best Regards

For and On Behalf of Aviation Security Company Limited
