1. Association of Doctors in Aesthetic Medicine (HK) Ltd (ADAM) currently has more than 180 Hong Kong doctor members mostly practicing in aesthetic medicine.

The proposed regulatory framework for medical devices will have a great impact on us.

a) a risk based approach, aiming for protection of public health, while

b) ensuring our community's continued access to safety use of current and new technologies.

3. We know that there will be different views on the issue, we will contribute our help in harmonizing, balancing and moving on the process.
