Dear Committee members,

As an ordinary citizen, my humble opinion is very simple. I support the COMPLETE BAN on Ivory trade in Hong Kong and hope that Hong Kong will do our part to protect the endangered Wildlife and the Rangers, help combat related criminal activities related to this trade and trafficking.

Secondly, there should be NO COMPENSATION or such ban will become an invitation to poaching. There have been help for Ivory carvers to get further employment which should have been sufficient for most workers in the legitimate Ivory trade industry. As for workers and traders in their old age, I urge that their needs should be taken care of the same way any vulnerable groups should be helped, and their concerns may even be fast tracked, but not in any form of compensation.

Last but not least, I pledge a much heavier penalty for all offenders so that a clear message will be sent to the world that this act is no longer tolerated in Hong Kong.

Yours sincerely,

Cheng Sau Ting, Aileer
