Dear Legco,

I have watched a documentary about the inhumane and cruel process of the ivory trade. I was astonished to find out that Hong Kong was actually the most ivory trafficked city in the world.

I heard you were creating a case to ban ivory trade and the whole deal so I am writing this email to you to not only offer my voice and support but a wake up call to you politicians. You people need to get up from your high mighty seats and start creating change, I am not blaming anyone or you but I am speaking out to those who are lazy and uncaring. There is more than enough proof in this world to show people that ivory is being smuggled and existing permits abused and cheated. I want this to end and so do thousands of people and students at my school, South Island School.

Whatever it is you are doing, count my voice in as a hong kong citizen add another person to that tally to show those corrupt and lazy politicians that Hong Kong wants to ban Ivory.

Ban Ivory Trade and Selling in HK

This might also cause economical issues as well.
