Dear Sir/madam.

I strongly believe that you should ban Ivory trade in Hong Kong. Firstly because thirty-five thousand elephants are dying every year.

Secondly elephants have to go through so much pain just so people can decorate their house.

Thirdly One elephant is dying every fifteen minutes.

Elephants are keystone animals meaning they help other animals.

So I hope you can help me and the elephants also it would be very kind if you could tell other countries.

Yours faithfully

Vienna Brooklyn Singh

Dear Sir / Madam,

I strongly believe that the ivory trade should be banned in Hong Kong because 35,000 elephants are dying every year due to poachers killing them for tusks, just tusks! This is equal to 1 elephant dying every fifteen minutes. Elephants are keystone animals because when they knock down trees they eat the leaves off but also the knocked down tree provides shelter for little animals and also lets sunlight in and lets grass grow so that animals that eat grass can move to that spot to eat the fresh grass while the place they moved from can regrow.

I hope that by passing a bill to make ivory trade illegal and shut down all ivory shops and the ivory market in Hong Kong, it will mean that more elephants can live. I would strongly suggest that this matter is discussed with other governments around the world to work towards a world-wide ban.
Yours faithfully,
Tiden Pan

Dear Sir/Madam

Today at school I've heard a elephant talk and after hearing it I feel sorry for the animals who died so I strongly believe that ivory should be banned in Hong Kong because elephants are important to other animals too. Elephants knock down trees so they have food and other animals could hide from the sun or hide from their predators also while elephants poo there are seed in them so green can grow from the sunlight.

Thirty-five thousand elephants are dying each year and that equal to one elephant is dying every fifteen minutes or ten percent of the world population.

I hope that by the government passing a bill to make the ivory trade illegal in Hong Kong, I would also hope you can discuss it with other governments around the world.
Yours faithfully,
Athena Yang

Dear Sir/Madam;

I am here to talk to you about stopping the ivory trade. I believe that you should ban the ivory trade because to get to the ivory that people buy elephants have to be killed by poachers and you might be thinking why we need elephants while your reading this, the reason is that elephants are very important to our environment because the elephants knock down trees then the insects and other small animals can feed of it, use it as shelters or use it as there homes. Then the elephants will eat the tree and they poo and their poo has seeds that will grow more trees.

So I hope that the government will make a law and ban people from selling or buying ivory. I also suggest the government to talk to other governments about making ivory trade illegal around the world.

Yours faithfully,
Cassandra Fung

8.11.17

Dear Sir/Madam

I hardly believe that the Ivory trade should be banned in Hong Kong. Elephants get killed 35,000 times a year just for their poor tusks. Ivory is only for decoration and not for anything useful.

We hope that the government pass a bill to make the Ivory trade illegal from Hong Kong. If we don't make the Ivory trade illegal then in 15 years there will be no elephant in the world.

Yours faithfully

Lola Davis

Dear Sir/Madam,

I strongly believe that the ivory trade should be banned because I feel that it is very crule to continue this. I want you to please just listen to me because a lot of bad things are happening in the world.

Elephants are being killed all around the world for their tusks wich are no use to us. If you don't banne ivory in Hong Kong we will have no more elephants. Thirty-five thousand elephants are being killed every year wich equiled to one elephant getting killed every fifteen minutes.

I hope you will consider banning ivory.

Yours faithfully,

Kate martha morean 家寶 Kobayashi

Dear Sir/Madam,

I strongly believe that the ivory trade should be banned in Hong Kong because 35,000 elephants are dying every year and one elephant is killed every fifteen minutes.

Elephants are important because they can knock down trees which help small animals for shelter, shade and protection. They are also helpful for saving other animals and helping them survive.

We hope that by the government passing a bill to make the ivory trade illegal in Hong Kong, it will mean more elephants can live. I would suggest that this matter is discussed with other governments around the world to work towards a world wide ban.

Yours faithfully,

Samantha

Dear sir/madam

I strongly believe that the ivory trade should be banned because every five and ten minutes one elephant gets killed for ivory and elephants are very important animals because they knock down trees and that gives shade and the shade keeps bugs and small animals safe and cool and also when the elephants poo they drop seed when they poo and that makes fresh grass that bugs and animals eat and if this keeps on going all of the elephants will be gone in five and ten years later

Yours faith fully

Dear Sir/Madan,

I strongly believe that the ivory trade should be banned in Hong Kong because 35,000 elephants are dying every year due to poachers killing them for their tusks. This is equal to one elephant dying every sixteen minutes. Elephants can knock down trees to help other animals to survive. Elephants are a keystone animal which means they help to maintain the existence of other animals.

We hope that by the government passing a bill to make the ivory trade illegal in Hong Kong, it will mean that more elephants can live.

Dear Sir

I strongly believe that the ivory trade needs to be banned from Hong Kong as it not humane. I am sure you didn't know or you would have banned it already but did you know that 35,000 elephants are killed per year just because of poaching! Not to mention that elephants are very helpful for the environment because when elephants knock down trees those trees provide shelter for animals and plants!

I hope that you ban ivory and speak with other governments to stop the ivory trade.

Yours Faithfully

Dear: Sir/Madam

I Strongly believe That Human trafficking should be stopped because people are just killing dead animals for useless things and there are 35,000 elephants dying each year and if you didn't know that equals One elephant dying each 15 minutes AND elephants are key stone species and leopards, lions, hyenas are also being killed. Well also elephants can help alot of different animals so think if you were an elephant and one of your family or friends die every fifteen minutes what do you feel.

But do you think Ivory is useful if you don't just banned it, and if you continue this in the end there will be no more of these animals. Let's work together and stop this Ivory trade.

Yours faithfully
Davin Yip

8.11.17

Dear Sir/Madam,

I strongly believe the ivory trade to be banned in Hong Kong because, to get the ivory they kill the elephants brutally with axes, bullets and other horrible ways. 35,000 elephants are killed each year due to this trade, that number is 1 elephant every fifteen minutes each hour 4 elephants each whole day forty eight elephants each week 326 elephants are killed and every 10 years 350,000 elephants are killed. And by then there are no more left.

Yours faithfully.

Milo Parr

November 8th 2017

Dear Sir/Madam,

I strongly believe that we SHOULD ban the shops that are selling ivory because the ivory comes from elephants. There is no use of selling ivory because the ivory only is for decorating your house/room and nothing else. Elephants are important because they knock down trees just to protect themselves and insects. Also, if we keep on killing elephants, there won't be any elephants left and then the ivory sellers won't have any more ivory. Also, there are only about four hundred thousand elephants left. Even if it seems like a big amount, thirty five thousand elephants are killed each year and that is equal to 1 elephant killed every 15 minutes.

Yours faithfully,

Candace Fung

8.11.2017

Dear Sir,

I strongly believe that the ivory trade should be banned in Hong Kong because thirty-five thousand elephants are killed a year meaning approximately 266,000,000 dollars are made by Ivory Sellers a year. Elephants are also keystone animals which means other animals rely on them.

Yours faithfully, Thomas Gregory

Kennedy School
19 Sha Wan Drive
Pokfulam
Hong Kong
8th November 2017

Dear Sir/Madam,

I strongly believe that the ivory trade should be banned because the elephants have many reasons not to die. They are 35,000 elephants left, they knock down to get food and they are the keystone animal to provide shelter for the small animals shelter, hiding from big animals, plus they need energy to protect their families and they eat what they want and then poop, in their poop they have seeds and grow trees.

It should be illegal in Hong-Kong because every 15 minutes an elephant dies because of people and companies to stop for ivory even shops. Please look carefully because it's up to you so all of us if the world can stop and leave them alone.

Your faithfully,

Esther Lily Victoria Rigden-
Green

Kennedy School

Hong Kong

8/11/2017

Dear Sir / Madam,

I strongly believe that the ivory trade should be banned in Hong Kong because thirty-five thousand elephants are being killed every year so after 20 years elephants will be extinct. Elephants are a keystone animal because without elephants other animals will become endangered. The elephant is a very important animal to our eco system because when an elephant knocks over a tree it eats and then the smaller animals use it as shelter it also creates grass and the other animals eat the grass then when the elephant has a poo all of the seeds in the poo creates more trees and grass then the whole cycle restarts. But if elephants were extinct the animals would all die and then we would die because we eat the other animals.

I strongly think that the government should ban ivory trade so that elephants can live. I strongly suggest that you should share this matter with governments worldwide.

Yours faithfully,
Sam Fearnley

Kennedy School

8/1/17

Dear Sir/madam

I strongly believe that ivory trade in Hong Kong should be ban't because ivory is only used for decoration plusse it is highly illegal to transport ivory. If we continue to kill animals at this rate there will be zero left in 15 years. Elephants are a key stone animal which means without Elephants other animals will die because elephants knock trees for small animals to have protection.

I hope this will convince you to make ivory trade illegal in Hong Kong. I would strongly suggest to talk and make a world wide ban.

Yours faithfully,

Maya Thakran
