

Bills Committee on Road Traffic (Amendment) Bill 2017

**List of follow-up actions arising from the discussion
at the meeting on 19 May 2017**

A member of the Bills Committee has noted that new low-floor wheelchair-accessible models of public light buses ("PLBs") that are of a length exceeding the current statutory limit will be used for the trial runs on three PLB hospital routes. The member then asked if such arrangement could also be implemented in other areas of Hong Kong. In this connection, the Administration was requested to provide information on the current PLB routes with regard to the following:

- (a) the road locations where vehicles with a length exceeding seven meters are not allowed to enter; and
- (b) the road locations, in particular those with a bend or on a slope, where low-floor wheelchair-accessible models of PLBs would be difficult or disallowed to enter/pass.
