- 1) strongly suggest govt impose laws to protect employers rather than domestic helper
- 2) disagree with yearly wage increase, if the DH are working well, we as an employer will aware them accordingly, no need the govt to get in charge of raising their min wage
- 3) govt should ban any DH breaking their contract more than twice during their stay in HK as so many of them trying to get fire from employer to earn the extra month salary
- 4) currently their no control over agencies, there are too many cases that the agencies line up with DH to work for a few months, taught them to quit and help them to find another employers. This not only allows the DH to earn an extra month of salary but also allows agencies to get additional referral fees for finding another replacement worker
- 5) if DH are allowed to live out, who is going to be responsible for their safety? What will their working hours like? If that's the case, who would still want to hire DH? Why not just hire local ppl which at least we can communicate with them better?
- 6) can the government bring in legislation to protect we as employers??
- 7) DH should also follow probation period and we shall not be liable to provide them return tickets if they have not worked a full 2 yrs contract

Do something to help your own citizen pls!!!!

Regards,  
Angie
