

Panel on Environmental Affairs

Subcommittee on Refuse Collection and Resource Recovery

Terms of reference

To study and review the existing policies on refuse collection and resource recovery, including the design, functions and distribution of related facilities, the sorting and logistic flow of refuse, and discuss with the Administration and make timely recommendations.

Work plan

1. To review the existing refuse collection and resource recovery system and how to enhance on-site treatment of community refuse, and promote the development of local recycling industry;
2. to review the design of refuse collection facilities and how to enhance the resource recovery function of refuse collection points; and
3. to compare the refuse collection and resource recovery systems of advanced cities overseas, and make recommendations for improvement to the Administration.
