

Panel on Environmental Affairs

Follow-up actions arising from the meeting on 24 October 2016

**Agenda item III — Review of the Fifth Technical Memorandum for
Allocation of Emission Allowances for Power Plants**

The Administration was requested to provide:

- (a) supplementary information explaining (i) the reasons why, unlike the measurement of ambient PM_{2.5}, there is no reliable measurement method of PM_{2.5} concentrations in a stack where water droplets are present, and (ii) whether reference can be made to the relevant measurement method(s) set out in the "EPA Method 202 Best Practices Handbook" issued by the United States Environmental Protection Agency in January 2016; and
- (b) the latest progress of achieving the target of reducing energy intensity in Hong Kong by 40% by 2025 (compared to 2005) laid down under the Energy Saving Plan for Hong Kong's Built Environment 2015~2025+.
