

Submission from Dr CHEN Chap-man

I, Chapman Chen, Ph.D., oppose the Proposed implementation arrangements for municipal solid waste charging.

Why must HK citizens use only garbage bags of the Govt.?

The Govt. may use this plan to probe into the private lives of HK citizens, violating privacy.

Many not so civic-minded people, in order to avoid paying the charge, might secretly dispose of rubbish on the streets, making HK a dirty city.

Real estate management companies may make unreasonable profits through processing rubbish on behalf of the residents.
