Hello,

My name is Natalie Gray and I am a teacher in California, USA. I am writing to ask you to please support a complete ban on ivory. Elephants are so endangered, and if poaching for ivory continues, they will be extinct within 10 years.

Many countries have already made this step, including the United States, Australia, Canada, and some countries in Europe. They made the ban because the elephant belongs to all of us as a civilization. You have the power to help the world celebrate, appreciate and save this wonderful and intelligent animal.

Elephants deserve to live in the wild in safety, where they can live as families and be the gardeners of the planet.

I truly hope you will ban all ivory in Hong Kong immediately. You will be saving an iconic species, the elephant.

Thank you,

Natalie Gray
