Dear sir

I was so disappointed that the government use the laws to forbid the trading on the ivory and do not offer any compensation to the owner.

It is unfair to them as the ivory are their own private asset. They use money to buy long time ago. And now the government have stopped the export of ivory, who going to compensate their lost?

How come the government done such inhuman action to the people? Compension is a must if the law is reallt have to go on. Please be considerate!

Yours sincerely
Kelly Chan
