Dear Sir

I knew that the protect the ivory trading is to protect the ecosystem. However, as i know the ivory owner kept the ivory stock long time ago. Thats mean these are their own assest. I think government can keep monitor on the ivory trading but not stop the trading.

Furthermore, free trading is working around the world. Ivory trading should be included. If government have to stop the ivory trading, why dont the government stop importing the ivory and let the ivory export out.

If the goverment have to use the law to against the trading but not giving any compensation, i think it's might not a proper action. Lets step into someone's shoes. How would you think if you are one of the owner? Please stop using the law against the trading or full compensate to the owner.

Thanks
Ms. Tsui
