Dear Sir/Madam,

In order to bring an end to illegal poaching , and thereby saving the elephant and rhino , one must bring the value of Ivory back to zero \$ and not pay compensation to present ivory stocks.

Only by making a statement that the only value ivory has to anyone is on an elephant or rhino , not in government storerooms, shops in town or anywhere.

Elephant tusk should be burnt publicly for all the world to see, especially to illegal poachers.

Please make Hong Kong a proud and responsible city that is prepared to sacrifice for the sake of our grandchildren, so they may view elephant and rhino in the wild.

Yours sincerely -

Mr. Jan Bochenski [REDACTED]
