Dear Hong-Kong

I am pleased to hear you will be banning the sale of ivory in your country.

I live in Kenya and have seen the massacre of many elephants in both Kenya and Tanzania.

This is devastating. Elephants are very important to Africa's ecology and natural survival.

Without them huge ecosystems will not survive

They are Africa's gardeners planting trees as they walk and clearing grasslands for plains game.

Elephants are an important iconic figures which attract tourists to these regions. Tourism is a very important economic factor for these countries.

Please help us keep our elephants safe and wild

Thank you

Annabella Francescon
